

**NOW LABELED FOR
POA ANNUA CONTROL IN
DORMANT BERMUDAGRASS TURF!**

ROUNDUP® THE FAST, EASY WAY TO KEEP YOUR COURSE LOOKING UP TO PAR.

ROUGH AREAS

TRIMMING

SPOT RENOVATION

SANDTRAPS

Roundup® herbicide puts you strokes ahead of all the weeding jobs that keep a course looking clean, well manicured and professional.

A 2% solution of Roundup applied through a hand sprayer controls more than 90 kinds of weeds, right down to the roots, so they won't grow back.

And no other herbicide is as versatile or easy to use as Roundup. Roundup controls labeled weeds around greens and sandtraps, along cart paths and driveways, and all the other places where weeds can be unsightly or present a playing problem. In the rough areas, Roundup quickly controls poison ivy and other woody brush species that bother golfers—but it won't

wash or leach out to harm desirable vegetation.

And for severe weed infestations, Roundup lets you renovate without cultivating. So you can do a small patch of turf or an entire fairway without ever disturbing play. Simply spray, wait ten days, slice soil, dethatch and seed. And because Roundup becomes inactive in the soil, it won't affect follow-up planting. There's no faster easier way to renovate.

Whatever and wherever your weed problems are, Roundup's par for the course. So see your chemical dealer for your supply soon.

Circle No. 136 on Reader Inquiry Card

Joe Inman, superintendent of golf and gardens; **Chip Guile**, head of the nursery and grounds; and maintenance worker **Randy Latta**.

grounds, two croquet courts which the Palm Beach Croquet Club uses as its home court, nine clay and five all-weather tennis courts and two golf courses, each with its own superintendent.

His work obviously agrees with him. With a pleasant disposition and quick smile, he takes a laid-back approach to managing his staff. The beauty of the grounds reflects more than efficient turf management. There, among the formal gardens and carefully manicured lawns, is an unmistakable amount of pride in the men who do the work so many come to admire.

"I love my work," Inman says. "The key is getting everything down to a system."

An innovation that Inman and Chip Guile, head of the nursery and grounds, devised is a "spaghetti" irrigation system for the main circular garden in front of the hotel. The garden contains 300 potted plants and each has its own individual spaghetti-like watering hose, fed from the central irrigation system. Inman likes the ease of replacing individually-potted plants.

Breakers West is the largest of the two golf courses with 125 acres to be mowed (250 total acres.) One hundred acres of Tifway 419 fairways and tees are fertilized with 96

pounds of nitrogen per acre in March and September. The Tifdwarf greens are fertilized with two pounds of nitrogen a month. A urea, water soluble fertilizer plus fungicide applied weekly is used in the winter (46-0-0) and sulfur coated urea (19-4-10) in the summer.

Superintendent John Baute says his main problem is water.

"Last year we had too much water, this spring we had too little," he said.

"Because this isn't a private club, we're open 365 days a year which makes maintenance a little harder," he continued. "We also have transient players here for the most part that may not take care of

"I love my work," Inman says. "The key is getting everything down to a system."

the course as well as members would."

Baute says he's particularly proud of the course's location—being totally surrounded by trees, not houses.

A crew of nine, including one mechanic and one cart mechanic, care for Breakers West.

Bill Remy is superintendent of the Ocean Course, directly adjacent to the hotel. It is one of the oldest courses in Florida. It was designed by Donald Ross and is the site every spring of the American Cancer Society Benefit Tournament. The course is 62 acres. Fifty acres are fertilized twice a year with 96 pounds per acre of nitrogen. It has 2.5 acres of Ever-

Part of Inman's "spaghetti" irrigation system among the individually-potted plants in the main circular garden.

 with 16-bushel
 BAC-VAC™**

Need A Clean Cut And A Clean Sweep?

The **HUSTLER 261** with 16-bushel **BAC-VAC™** does both in **ONE** operation.

Because of its compact size and superb maneuverability, the 18 hp **HUSTLER 261** with 5 hp **BAC-VAC** grass vacuum attachment can handle any job from grass clippings to leaves. The giant 16-bushel hopper dumps from the operator's seat.

The **HUSTLER BAC-VAC** features a 5 hp vacuum engine to create its high capacity vacuum flow so neither the tractor nor the deck are robbed of power or performance.

Other features include air discharge flow through the bottom rear door for a clean operator environment; and a new air sweep that diverts air from the bin to a side opening for sweeping walks and drives, or for side-discharging clippings.

BAC-VAC™

The Breakers is still run by descendents of railroad magnate Henry Flagler.

glades #1 greens.

"We have the old-style elevated greens at the Ocean Course and that's something not usually found in the newly-designed courses in South Florida," he said.

The Ocean Course gets heavier play than Breakers West, possibly because it's the shorter of the two courses and is closest to the hotel. Breakers West is about 15 minutes away. Because of Palm Beach city ordinances, Remy's crews can't start mowing until 7 a.m. He also has to contend with a half automatic, half manual irrigation system.

"The manual half should be converted within the next year or two," he said.

The Ocean Course also has a crew of nine, one mechanic and one cart mechanic.

Overseeding is done the first week of December, one green at a time, so as not to disturb play. On Breakers West, Inman uses 3,500 pounds of a mix of Citation, Birdie and Omega ryegrass; on the Ocean Course, 1,500 pounds of Kentucky Bluegrass; and on the hotel grounds and golf course fairways, 10,000 pounds of annual ryegrass.

The hotel grounds has a crew of 11 and one supervisor. The grounds sport 3,500 summer annuals, including marigolds, bush daisy, canna lilly, torenia, and dusty miller. Winter annuals are

begonias and geraniums. Plant beds have more than 2,000 plants, mainly hibiscus, oleander and copper leaf. Phoenix, caryota, dictyosperma, alexander, areca, royal, coconut, sabel and chamaedorea palms provide ambiance as well as

With the constant problems of wind and sand, Inman uses wind and salt-resistant plant materials such as cactus, century plants and natural screens such as Australian pines.

homes for wild parrots. Last year, many of the palms were infected with lethal yellowing and were replaced with Malayan dwarf coconut palms. Five miles of hedges include ligustrum, exoria, crown of thorns, carissia and pittosporum. More than 500 poinsettias decorate the front foyer for Christmas, and at Easter time 325 individually-potted hydrangeas are on view. All potted annuals are bought through a local supplier.

Inman's insect control program is curative rather than preventative. On the golf courses he has problems with sod webworm and army worms and uses Sevin and

Dursban to keep them under control. His worst problem, however, is mole crickets.

"We had a lot of rain last year which drowned many of the larvae, so the problem shouldn't be as bad this year," he said. Oftanol usually keeps them under control. The frequency with which he replaces plants also acts as a check on insects.

Most of Inman's equipment is Toro.

He has six Toro Greensmaster 3s, two TurfPro 84s, two Groundsmaster 72s, a Rake-O-Vac and vacuum blower. His sweeper and trim mower are Jacobsen.

"We don't use rotary mowers on Bermudagrass," Inman said. "We want a hand look without hand labor."

His 300-plus equipment list includes two Dedoes aerifiers, a Ryan Greensaire, Bean turf sprayers (125 and 300-gallon capacities), a Ditch Witch trencher, Ryan sodcutter, Asplundh bush chipper and Cushman trucksters. His machinery is trucked between golf courses.

"I have a very good relationship with distributors," Inman said. "They've even let me try certain pieces of equipment, and in general, are very cooperative."

Breakers West is irrigated with a Toro Vari-Time 690 Series automatic sprinkling system powered by two, 50 hp centrifugal pumps fed from lakes and wells. The Ocean Course is automatic with Moody controllers and Rainbird heads for nine holes. The other nine are irrigated with a galvanized pipe and quick-coupler system. It uses city water and Inman said water bills can run as high as a couple of thousand dollars a month. The hotel grounds used to be hand watered and with sprinklers. Now, it is on a semi-automatic system.

"Eventually, we hope to put it on timers," Inman said.

About 600 yards of premix 70/30 soil and 50 bales of peat moss are

BOOKSTORE

335-LANDSCAPE DESIGN THAT SAVES ENERGY by Anne Simon Moffat and Marc Schlier
Practical guide to landscaping a home or office to reduce space heating needs by as much as 30 percent annually. Contains specific planning strategies for the four main climatic zones of the continental United States. **\$9.95**

360-RESIDENTIAL LANDSCAPING I by Theodore D. Walker
Provides an in-depth discussion of the planning, design and construction phases of residential landscaping. Illustrated with the work of professional landscape architects. Covers everything from analyzing the site to constructing the landscape. **\$22.50**

395-LANDSCAPE ARCHITECTURE by John Ormsbee Simonds
A Manual of Site Planning and Design. This long-awaited second edition outlines and analyzes the complete landscape process from site selection to finished project. In simple and clear terms it describes various planning constraints imposed by the forms, forces and features of the natural and built landscape. **\$34.95**

790-RECREATION PLANNING AND DESIGN by Seymour M. Gold
A comprehensive look at recreation needs for parks and how they can design the park facility for the community. Book's content can help justify construction and maintenance needs. **\$39.50**

800-THE GOLF COURSE by Geoffrey S. Cornish and Ronald E. Whitten
The first book ever to give the art of golf course design its due, and golf course architects the credit and recognition they deserve. 320 pages and approximately 150 color and black and white photographs. Traces the history and evolution of the golf course, analyzes the great courses, shows how they were designed and constructed. **\$35.00**

615-TURF MANAGEMENT FOR GOLF COURSES by James B. Beard
Written by an eminent turfgrass researcher, this USGA sponsored text is an ideal reference and "how to" guide. Details all phases of golf course operations including course design and construction, turf management, course administration, irrigation, equipment and disease and pest control. Fully illustrated. **\$45.00**

010, 015-ADVANCES IN TURFGRASS PATHOLOGY by Dr. B.G. Joyner & Dr. P. Larsen
Leading U.S. turf pathologists report on turfgrass diseases, pythium blight, snow molds, fairy rings, leaf spot of Kentucky Bluegrass in Minnesota, initial and filed fungicide screening, turfgrass disease resistance, etc. Contains new ideas on how to combat turfgrass problems. **\$27.95 hardcover, \$18.95 paperback**

625-ADVANCES IN TURFGRASS ENTOMOLOGY edited by H.D. Niemczyk and B.G. Joyner
A complete account of the facts presented at the 1980 Symposium on Turfgrass Insects. 200 photographs, tables and graphs make this volume an indispensable reference for anyone connected with the turfgrass industry or research. **\$24.95**

110, 120-TURF MANAGERS' HANDBOOK by Drs. William Daniel and Ray Freeborg
This specially designed manual by leading turf specialists is a comprehensive, organized approach to turfgrass science and care. An easy, on-the-job reference for planning, purchasing, hiring, construction and plant selection. **\$23.95 hardcover, \$18.95 paperback**

645-MANAGEMENT OF TURFGRASS DISEASES by J.M. Vargas
Identifies turfgrass diseases by description and illustration. Includes a holistic approach to healthy turf and lawns. Presents practical management strategies for golf courses, lawns and athletic fields. 204 pages, illustrated. **\$24.95**

655-TURFGRASS: SCIENCE AND CULTURE LABORATORY MANUAL by Beard, DiPaola, Johns and Karnok
Class tested for over three years, this manual provides fourteen exercises which can be easily adapted to your particular course structure. Exercises involve students in vegetative and seed identification, equipment and irrigation system selection and operation, problem solving of typical math problems involved in turfgrass operations and the diagnosis of problems with emphasis on weeds, diseases and insects. Encompasses both warm and cool season turfgrass. **\$10.95**

635-IRRIGATION PRINCIPLES AND PRACTICES by Hansen, Israelsen and Stringham
A new fourth edition of this highly successful textbook presents essential concepts pertaining to water conveyance, application, storage in the soil and use by the plants. Basic underlying principles that govern irrigation practices are stressed. Generalized concepts are discussed and newly formulated practices are examined. **\$34.50**

565-WEEDS by Walter C. Muenscher
Second edition. Premier text for identification and basic natural history for weeds found in the continental United States and Canada. Ecological data on weed biology combined with excellent keys and plant descriptions makes this an essential reference book. **\$34.50**

455-THE GRAFTER'S HANDBOOK by R.J. Garner
Revised and updated fourth edition. The encyclopedia of plant propagation by grafting. Contains information on the chemical control of weeds in orchards, on diseases and on the vegetative propagation of woody plants. **\$19.95**

405-WOODY ORNAMENTALS by Parfyka, Joyner, Rimelspach, Carver
Illustrates plant identification characteristics. Organized in two basic sections: plant identification and plant disorders. This text utilizes 430 color photos, 430 line drawings and 45 black and white photos to simplify identification. Goes into detail on plant identification and description as well as plant problems such as diseases, chemicals, insects, animals and physiological disorders. **\$27.00**

60 WEEDS TREES & TURF/AUGUST 1983

BREAKERS from page 55

used a year on the golf courses and in flower beds.

The Breakers has its own nursery, but the three-person staff is only half the size Inman would like it to be. Three acres are under shade and five acres are devoted to container stock. The nursery grows most everything (except annuals) that's found on the hotel grounds, including palm trees.

Overseeding is done the first week of December, one green at a time, so as not to disturb play.

Inman works on a budget of over \$500,000. "In one respect I have no budget," he explains, "If I have a legitimate expense, we usually buy it."

Inman started out as a business major at the University of South Carolina, but left after two years to become the golf pro at Camp Lejeune, NC, where he stayed for four years. That was only the start of being a golf pro at such courses as Sea Pines Plantation at Hilton Head, SC; Yeaman's Hall Club, Charleston, SC; and the Surf, Golf and Beach Club at Myrtle Beach, SC. He taught golf at Patrick AFB in Cocoa Beach. In 1976, he enrolled at Lake City Community College in Lake City, FL, and graduated with an Associate's Degree in Golf Course Operations. In 1979, he came to The Breakers working in the nursery and then was promoted to assistant superintendent at Breakers West. In Sept. 1981, he was named superintendent of golf and gardens.

"Ideally, I would like to be in a position where I can be a golf pro and a superintendent," he said. "Some clubs are calling them golf managers."

At age 41, Inman is doing what he likes to do. He's in a satisfying career, golfs about once a month (he's a 3 handicap golfer) and is an amateur photo buff.

"My ego and self-esteem here are very satisfied," he says. **WTT**

HOT SEAT from page 48

Some respondents, however, pointed to the fact that it was less expensive to contract out certain jobs than to have them done in-house.

"I can see more contracted landscaping and gardening in the

There is increasing competition from landscape maintenance contractors.

future because of cost," said one manager.

In the majority of cases, the landscape supervisor specifies the landscape program and the purchase of chemicals. Budget planning is done mainly from September to January.

Survey results show very low participation in landscape associations or organizations by apartment/condo landscape managers.

"PAY" YOURSELF \$1000+ to BUILD THIS NEW 4-WHEEL HAULER

- 16 or 11 H.P. Briggs & Stratton electric start engine • automatic torque converter transmissions
- 500 lbs. payload plus two passengers • dump box 44½" x 40" x 11" • steering wheel, foot pedal controls
- forward and reverse gear • rear dual hydraulic disc brakes

Tough Mark Series Haulers lug 500 lbs. of cargo plus you and a passenger almost anywhere. 16 H.P. opposed Twin-Cylinder or 11 H.P. Synchro-Balanced Briggs & Stratton engine, automatic torque converters (no manual shifting), alternator and electric start. Steering wheel, foot pedal accelerator and brake (rear dual hydraulic disc), forward and reverse gear let you maneuver easily with speeds up to 25 MPH. Dump bed 44½" x 40" x 11" extends to over 4' with tail gate opened. Many accessories.

Build it yourself and SAVE \$1000+. Engine mounts to welded & painted frame. Tires mounted on rims. You bolt parts together and pocket assembly costs. Only simple tools needed. Thousands from eight to 80 have built a Carl Heald Kit.

For FREE color brochure call TOLL FREE 1-800-253-1030 (in Michigan call 616/849-3400) or write:
