

# For everything from heavy-duty walk-behind mowers to powerful backpack blowers, make John Deere your one-stop shop.

Odds are you associate John Deere with dependable mowing tractors. But did you know John Deere also offers a wide range of outdoor power equipment that's just as reliable?

You do now.

Fact is, in addition to outfitting you for big mowing jobs, your John Deere dealer can equip you with lawn mowers, nylon-line trimmers, edgers, backpack blowers and many other products to smooth out the rough spots on any job.

The entire equipment lineup is designed and built for strength and durability to stand up to the demands of commercial jobs.

Take the new 21-inch commercial mower, for example. Its deck is made of rugged die-cast aluminum. And we use steel wheels with double ball bearings for long life. Handles are heavy duty. The engine is 2-cycle, the fuel tank large.

Choose the 3-hp edger to maintain a well-groomed appearance along sidewalks, curbs and driveways. You can even adjust it to put a beveled edge on the lawn.

For cleanup tasks, the No. 4 Backpack Blower is ideal. Use it to clean grass clippings from walks or for a variety of other chores. There's also an optional spray-mist attachment.

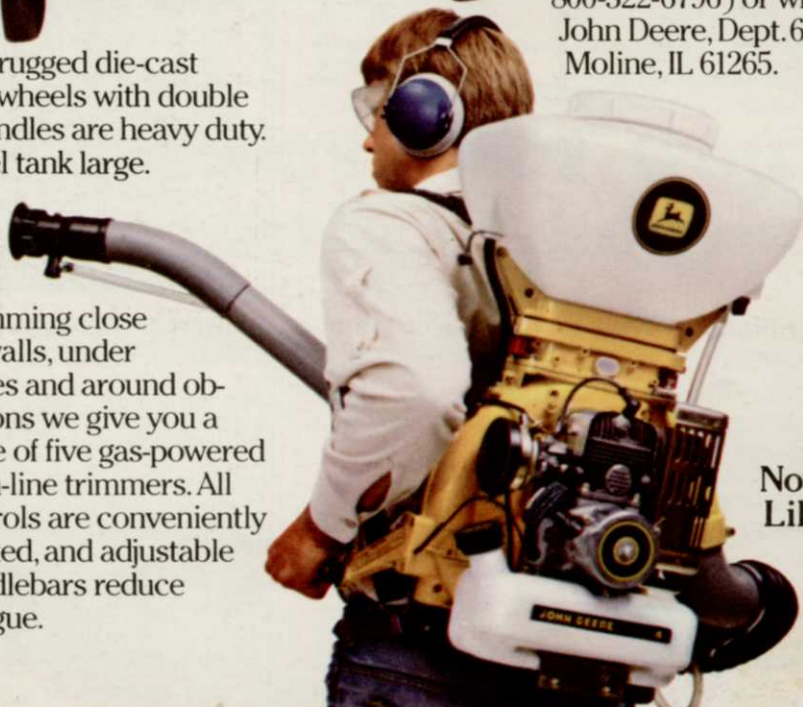

All this plus much more, including high-pressure washers, welders, power tools, portable alternators, space heaters and air compressors proves that your John Deere dealership is the right stop for many of your needs.

For the name of the nearest dealer, or a free folder on these John Deere products, call 800-447-9126 toll free (Illinois 800-322-6796) or write John Deere, Dept. 62, Moline, IL 61265.

For trimming close to walls, under fences and around obstructions we give you a choice of five gas-powered nylon-line trimmers. All controls are conveniently located, and adjustable handlebars reduce fatigue.
