BIG

With the "Big Little Rotor" (17017), Buckner brings the best value in the business. It operates at full or part circle with easily set arc stops. It also has an anti-backsplash arm and a 23° trajectory angle to combat the wind. And these are just a few of the reasons it performs so well. An impact resistant plastic housing and lid and brass bearing journal make this little rotor tough enough to keep on performing for years.

Side and bottom inlets reduce installation costs. Maintenance is easy because all internal parts are removable from above ground *without any special tools*. And, a heavy retraction spring makes sure the sprinkler stays down when not in use.

For more information on the "Big Little Rotor" and other fine Buckner residential/light industrial products, contact your local Buckner distributor today!

The Not-So-Elusive Brass Ring

On April 23, 1985, 14 leaders in various facets of turfgrass came together at Beltsville to assess the future of safer sports turf.

Discussion was open, frank and spirited with no hidden fears of "loss of identity" or "loss of territory."

Affiliated interests, such as the Professional Grounds Management Society, the Sports Turf Manager's Association, The Lawn Institute, the Golf Course Superintendents Association of America and the Professional Lawn Care Association of America, have become deeply involved in the sports turf movement because they see a long-range benefit to their memberships.

The executive directors of two of these groups greatly desire increased memberships so that more professional people can share the benefits of the information on sports turf now being gathered by the new Sports Turf Research and Information Committee of the Musser International Turfgrass Foundation, a neutral, unbiased, tax-exempt organization.

Helping affiliated groups become stronger is an unselfish act. "In union there is strength" as history has told us. Those who forget history are doomed to repeat it.

So now, through the existing turfgrass media, we have the opportunity to promote a "Green Machine," the strength of which has not been heretofore realized. Let us all forget petty protectionism and go for the Brass Ring. Let's all work together ... for safer sports turf.

CLEAN-UP in a BIG way

- QUALITY
- RELIABILITY
- SERVICE

with the BROUWER-VAC

Also picks up debris & litter

OUTSTANDING FEATURES

- 335 cu. ft. load capacity
- Dual flotation wheels – low compaction
- All hydraulic operation – finger tip controls
- Extensive use of aluminum
- Wide, floating suction head - up to 120 in.
- 35 - 45 H.P. tractor requirement

Self unloading
with Hydraulic Door

The new Brouwer-Vac can be the answer to your clean-up problems. Designed to easily and economically pick up thatch from verti-cutting, grass clippings on sod farms, parks and golf courses. It has also proven very efficient when used to pick up leaves, twigs, paper, food con-

tainers and other such trash and litter that require cleaning up from airports, sports stadiums and highway shoulders. For these and other applications, the Brouwer-Vac will provide a fast, efficient, reliable and economical way for you to "clean-up BIG".
