For Maximum Emergence
And Seedling Establishment,
Ask For

APRON[®]

Treated Turfgrass Seed.

Apron Treated

Untreated

Apron, a systemic seed treatment fungicide, works on contact to control *Pythium* on the outer surface of turfgrass seed.

As the seed starts to germinate, Apron is systemically translocated throughout the entire growing seedling.

Since Apron systemically protects young plants from *Pythium* infection, you get maximum emergence and seedling establishment. This allows you more maintenance time for your green and tee establishment program.

After seedlings are established, it is recommended that you follow up with fungicide treatments of Subdue[®] to maintain *Pythium* control in turf.

Call your seed distributor and ask for Apron treated seed for all your professional turfgrass plantings.

Gustafson

P.O. Box 660065 • Dallas, Texas 75266 • (214)985-8877

Apron and Subdue are Reg. TM's of CIBA-GEIGY.
Gustafson (logo) is a Reg. TM of Gustafson, Inc.

Milorganite stands alone

Supplying Nutrients the Way Plants Want Them

MILORGANITE (NATURE'S WAY) VS SYNTHETICS

- No matter how hard scientists have tried, they have failed to match synthetic nitrogen's release with natural growth patterns.
- Granulation does make a difference. Slow and even release by nature's soil bacteria provides Milorganite's nitrogen when and as grass needs it — Never duplicated by chemical fertilizers.

★ THE MILORGANITE EXTRAS ★

SUPPLIES HUMUS: In addition to being the ideal fertilizer, Milorganite also adds large quantities of organic matter (humus) to the soil. Naturally organic Milorganite actually improves the plant growing capabilities of all soils and has been perceived to reduce disease incidence and the build up of harmful thatch.

NO WATERING-IN REQUIRED: Naturally organic Milorganite does not require watering in, so lawns require less water in the heat of summer. Naturally organic Milorganite improves water holding capabilities of most soils for improved drought resistance.

OPEN DOORS AND CLOSE SALES with WEEDS TREES & TURF

Attention Lawn Care Companies, Distributors, Lawn and Garden Retailers and Seed Marketers:

From your own experience, you know that when the typical homeowner looks out of a window of his 15-year-old or older home, he sees an aging, dull lawn without a single improved variety of grass in it. What he would like to see is what he's noticed on newer lawns — greener, healthier, finer-bladed grass — but he doesn't have the slightest idea of how to achieve it.

You Can Show Him How... Profitably!

The publishers of WEEDS TREES & TURF are providing you with a unique opportunity to inexpensively educate homeowners on a personal level about the availability of high-quality grass seed and the ease of application. The result is greener lawns, more satisfied customers, and higher profits for you!

This inexpensive, easy-to-read "how to" promotion can be used as a self-mailer or door hanger on those home lawns you know need reseeding. It explains:

1. Why tired lawns don't measure up to today's standards.
2. How easy it is to cost-efficiently improve a lawn.
3. What facts to look for on the seed bag label to insure compatibility and quality.

Order Your FREE SAMPLES Today!

See for yourself how useful this door hanger/MAILER can be to your business without any obligation. Simply circle the appropriate number on the Reader Service Card bound in this issue of WEEDS TREES & TURF. We'll send you your free samples of this high-impact, customer-oriented promotion along with complete ordering information without delay.

TARGET THE ENEMY FOR EFFECTIVE INSECT CONTROL

DURSBAN*

Win the war against chinch bugs, sod webworms, billbugs and other insect enemies that invade your turf. Lebanon has the ammunition you need—two insect control formulations containing DURSBAN Insecticide.

Greenskeeper Insect and Grub Control and Country Club 19-4-6 with DURSBAN

DURSBAN sets its sight on harmful insects for effective surface and soil control, but it won't harm birds, pets or other lawn allies. It also doesn't build up toxic levels in the soil and is the only insecticide with published human toxicity data.

Lebanon's full-weight, high-density products containing DURSBAN are easy to apply with any spreader—one application gives you the weaponry you need.

Enlist the Total Turf Troops

Of course, DURSBAN is backed up by Lebanon Total Turf Care and its complete network of sales representatives, distributors and service professionals. Lebanon is a major distributor for The Dow Chemical Company. And because we're 'Partners with Dow', additional DURSBAN formulations are available.

For more information on DURSBAN, or our full line of fertilizers, SCU blends, combination products and straight chemical products, call our **Greenline** today at 1-800-233-0628; in Pennsylvania, call 717-273-1687. And start winning the battle against insects and other turf enemies . . . from the ground up.

Dawning of a new age?

If you've been reading WEEDS TREES & TURF for the past few months, you know of inroads being made in the development of plant growth regulators (PGRs) for turf.

Monsanto's Limit was the first PGR introduced for "Class B" turf: grassy areas needing more than minimum maintenance but not as much care as a good-looking home lawn. Then, just recently, O.M. Scott & Sons began marketing Turf Growth Regulator Plus Fertilizer (see "Green Industry News") for golf course fairways in the south.

Landscape managers, though, have just seen the tip of the iceberg.

"We have perceived that the real opportunity in this area is not along highways, but on more intensely maintained turf," notes Dave Gerwitz, Monsanto project manager. "We look at Limit as being a very good first step."

"New generation" PGRs do not have many of the drawbacks of their predecessors. Indeed, some have benefits. Jeff Nuss of Kansas State University and Bob Shearman of the University of Nebraska, for example, are conducting tests on the possibility of Limit reducing evapotranspiration loss and thus slowing turf water usage. Limit has also been proven a color-enhancer. The Scott product has been shown to be a fertilizer enhancer and to reduce scalping potential, among other things.

Turfgrass PGRs could hit the residential market as early as 1988, according to some experts. Dr. Tom Watschke of Penn State University once predicted that homeowners would be able to buy PGRs in little spritzer bottles for hard-to-trim areas by 1990.

Will this mean less work for landscape management companies that specialize in mowing/maintenance? Not according to Gerwitz.

"These products will not put the mowing/maintenance person out of business," he contends. "In effect, they will allow him to do his job better."

Judging by the information imparted during recent trips to Monsanto in St. Louis and Scotts in Marysville, Ohio, it appears that the landscape manager will be seeing many more turf PGRs with many more different applications—including one for almost every situation—in the next decade.

You make it a work of art. Surflan® keeps it a picture suitable for framing.

Surflan stops more than 50 different weeds and grasses before they emerge. Yet it's labeled for use on more than 175 different ornamentals. No other ornamental herbicide can top these numbers.

Surflan preemergence herbicide is so gentle on your established shrubs and ornamentals you can spray it directly over the top, even over sensitive ornamentals like petunias.

At recommended rates of 3 oz. per 1,000 square feet, Surflan keeps tough weeds out all season long. That makes your work a real work of art.

Choose from quarts or gallons. Call your Elanco distributor or write:
