

ONE BOLD STROKE

...and suddenly traditional

It's here.

John Deere's new line of golf and turf maintenance equipment. Equipment and product support programs that will improve the way you do business. And, like steel-shafted golf clubs did to hickory, suddenly make traditional comparisons seem obsolete.

Start with one-day parts service. In one bold stroke you now have access to the best parts and service network in the business.

Your John Deere dealer normally stocks 90 percent of the parts you need. The ones he doesn't have, he

can generally get overnight. Compare that with the service you're getting now.

Then compare products. This new line includes machines that can take your golf or turf-care operation full circle.

The walk-behind greens mower delivers tournament-quality cuts with solid aluminum drive rollers and a high-strength steel bedknife.

Four hydraulic reel mowers provide quality cuts on fairways or in other wide-area applications. The 303 and 305 are 3- and 5-gang pull-behind units. The 756

comparisons seem obsolete

and 856 each feature three tractor-mounted reels. All are available with 4-, 6-, 8-, and 10-blade reel options.

Utility machines include the 1500 Utility Vehicle that can be equipped as a sprayer, spreader, or hauler, and the 90 Boom Mower that reaches over 9 feet to make quick work of hard-to-reach areas.

Five new aerifiers round out the line. Units that breathe new life into your turf with various spoon, blade, and shatter-tooth options.

Add the products already available from John Deere like gas and diesel front mowers, backhoes,

commercial walk-behind mowers, trimmers, blowers, generators and more, and you have a new one-stop supplier for your operation.

Talk to your John Deere dealer today for a test drive of one of these new machines. And don't forget to ask about his financing, warranty, leasing, rental, and revolving credit programs.

Because for 150 years our customers have associated the name John Deere with quality. And today, with you as our newest customers, we're anxious to show you why.

Arrange for a test drive of John Deere's new golf and turf equipment at one of these dealer locations

JOHN DEERE

58th International Golf Course Conference and Show

Phoenix Civic Plaza January 26 - February 2
Schedule of Activities

● Saturday, January 24 (Tucson)

8 a.m. to 5 p.m.-One day seminar:
USGA Intermediate Rules of Golf

● Sunday, January 25 (Tucson)

8 a.m. to 5 p.m.-One day seminar:
Business Communication & Assertiveness Techniques

● Monday & Tuesday, January 26 & 27

8 a.m. to 5 p.m.-Two day seminars:
Irrigation Part I: Equipment & Technology
Insects of Turf & Ornamentals I
Golf Course Design Principles
Introduction to Soil Science
Weed Identification & Control
Landscape Plant Materials
Introduction to Surveying
Plant Nutrition & Fertilizers
Basic Turfgrass Botany & Physiology

● Tuesday, January 27

8 a.m. to 5 p.m.-One day seminar:
Business Communication & Assertiveness Techniques

● Wednesday, January 28

8 a.m. to 5 p.m.-One day seminars:
Familiarization With Accounting Procedures
Negotiating
History & Function of GCSAA
Cardiopulmonary Resuscitation
Newsletter Editors

● Wednesday & Thursday, January 28 & 29

8 a.m. to 5 p.m.-Two day seminars:
Irrigation Part II: Systems Design & Management
Turfgrass Qualities, Uses & Sources
Golf Course Construction & Project Management
Basic Horticulture Methods
Disease Identification & Control

● Thursday, January 29

8 a.m. to 5 p.m.-One day seminars:
USGA Golf Course Rating System
Effective Business Writing
Budgeting & Forecasting
The Asst. Superintendent: Functions & Responsibilities

8 a.m. to 5 p.m.-Certification Exam Prep Courses
1 p.m. to 5 p.m.-Half day seminar:
Practical Tee Management for Golf Courses
5:15 p.m. to 6:30 p.m.-Opening Session

● Friday, January 30

8 a.m. to noon-Concurrent educational sessions:
Practical Golf Course Management I
Fairways: Changes & Practices
Construction Techniques in Renovations
New Products & Technology
11:30 a.m. to 1 p.m.-CGCS Luncheon
1 p.m. to 5 p.m.-Concurrent educational sessions:
Practical Golf Course Management II
Your Spouse, Your Family & You
Organizational Management
High-Tech Turfgrass Management Through Computers
5:15 p.m. Members' Briefing/Meet the Candidates

● Saturday, January 31

6:30 a.m. to 8:30 a.m.-Prayer Breakfast
8 a.m. to 5 p.m.-Sports Turf Managers Assoc. Workshop
9 a.m. to 5 p.m.-Trade Show Open
9 a.m. to 3:30 p.m.-Certification Examination
1 p.m. to 5 p.m.-Concurrent educational sessions:
American Society of Golf Course Architects Conference
National Golf Foundation Workshop
Golf Course Builders Conference
International Golf Course Management
Military Golf Course Management

● Sunday, February 1

8 a.m. to 11:30 a.m.-Concurrent major speaker sessions:
Rita Davenport
Jack Kaene
Dr. James Melton
9 a.m. to 5 p.m.-Trade Show Open
11:30 a.m. to 1 p.m.-Keynote Speaker Brunch
1 p.m. to 5 p.m.-Half day seminar:
How to Use the USGA Turfgrass Information File
8 a.m. to noon-USGA Green Section Conference
9 a.m. to 3:30 p.m.-Certification Examination
1:30 p.m. to conclusion-Annual Meeting
6 p.m. to midnight-Annual Banquet, Show & Dance

State of the Green Industry

"I have only eighteen concerns when selecting my greensmowers."

*Peter Smith, Superintendent
Shinnecock Hills Golf Club*

"When you're hosting the U.S. Open, the quality of your greens is going to be evaluated by the best golfers in the world and a national television audience. That's why I use only Buntun mowers to maintain my greens here at Shinnecock Hills," says Golf Course Superintendent Peter Smith.

Since he discovered Buntun mowers, Smith has purchased eight greensmowers and two teemowers. Here are some of his comments.

On the tournament:

"For three years before the 1986 Open I mowed my greens at 5/32" with 22" Buntun walk-behinds. For the tournament I mowed at 1/8". The Buntun doesn't have a floating head so I get a true 1/8" cut once I set and lock in the height. With the new Buntun tournament knife I can easily get down to 7/64" without digging into the green."

On Buntun features:

"The powered rotary brush is a great feature. It stands the grass up before it's cut to control grain and

eliminate runners. I use grooved rollers for closer, more accurate cuts and verticut attachments for thatching."

"The solid aluminum drive rollers on the Buntun machines give me firmer greens without compaction. They cut straight, since both rollers are powered, and I've never had a problem with the engines."

On teemowers:

"My tees concern me as much as my greens. With Buntun I get a striped, walk-behind look, plus the efficiency of a 26" mower. After all, those TV cameras focus on the tees almost as much as the greens. They have to be in top condition."

For at least eighteen more good reasons to use Buntun, write or call for our new literature and the name of your Buntun distributor.

To some turf herbicides, everything on

Fortunately, there is WEEDONE® brand DPC AMINE broadleaf herbicide.

Unlike common esters, it's a powerful 50/50 mix of 2, 4-D and dichlorprop in a non-volatile amine salt formulation.

So it stays where you spray.

And unlike most three-way herbicides, WEEDONE® brand DPC AMINE contains no dicamba.

So there's no risk of root uptake or the damage it can cause to surrounding trees and ornamentals.

And while it works on over 70 weeds, including many of the more difficult to control, it's harmless to most species of turfgrass.

Making it the only post-emergent broadleaf herbicide you may need for lawns, parks,

this page looks like a broadleaf weed.

Silver Maple

Dandelion

Ground Ivy

Dogwood

Henbit

Lilac

Spotted Spurge

Chickory

Thymeleaf Speedwell (Veronica)

Boxwood

Yellow Woodsorrel (Oxalis)

Hawkweed

Yarrow

golf courses, athletic fields, virtually any turf area.

Which not only simplifies inventory and handling, but budgeting as well.

For even more economy, WEEDONE® brand DPC AMINE herbicide mixes easily

with most liquid fertilizers for one-trip broad cast application.

So, no matter when you need it, no matter how determined the weed, ask your turf chemicals supplier for WEEDONE® brand DPC AMINE broadleaf herbicide.

After all, you shouldn't have to clear the land just to clean up a little weed problem.

From the turf care group at Union Carbide.
