

Having trouble
getting bentgrass?

Try
Jamestown

Chewings Fescue

It's no secret that bentgrasses are in short supply. It's hard to get enough creeping bentgrass.

But there is a solution: Jamestown chewings fescue! After all, chewings fescue has been used on golf courses for over three centuries. And there's none better than Jamestown. It's been proven in tests at the University of Rhode Island and on prominent courses for more than 20 years.

For new greens

Cut your bentgrass needs in half by using a mix which is 50% Jamestown and 50% bentgrass by seed weight. Not only will this match the performance of a solid bent, but will give some added benefits as well.

Jamestown establishes quickly and puts the greens into play faster. It will perform as a companion grass for up to 10 years as the bentgrass matures and gradually dominates the turf.

For repairs

Use 3-4 pounds of Jamestown with 1/2 lb. of bentgrass per 1000 square feet. This mixture has proven very effective in emergency repair of damaged greens.

For winter overseeding

Consider Jamestown as part of a mix for overseeding southern Bermudagrass greens, tees and lawns. Jamestown will enhance turf performance during winter months.

So whether it's to help out with a bentgrass shortage, or add benefits to your overseeding program, try Jamestown chewings fescue.

Jamestown chewings fescue played a big part in developing The Links at Spanish Bay in Monterey, CA:

Greens: 80% Jamestown, 20% Colonial bentgrass

Tees: 100% Jamestown

Fairways: Blend of chewings fescue including Jamestown

Roughs: Mixture of fescues including Jamestown chewings, Reliant hard, sheep and creeping red.
