

Manhattan II

...it's a whole new ball game!

The professionals who maintain athletic fields have made Manhattan the standard for hard use turf areas.

The best has now become better. Years of cooperative research by New Jersey Agricultural Experimental Station and Pure Seed

Testing, Inc. have gone into the development of Manhattan II. The results are darker green color and finer leaf texture than Manhattan. Manhattan II provides good heat and drought tolerance, good shade adaptation and excellent spring greenup.

Manhattan II establishes quickly and has better mowability than our old standard. With brown patch and crown rust resistance, Manhattan II is the ideal surface for work or play.

Manhattan II . . . we've improved everything about it, including the price!

Qualified turf associations can earn cash for turf research by saving Manhattan II blue tags.
