

You never know what's hit you when you see patch disease. It could be Fusarium blight. Or necrotic ring spot. Or summer patch. Or take-all patch. Or spring dead spot. Or any combination.

They all look very similar on turf. Only with a microscope can you tell them apart. So guessing which one's causing your patch disease still leaves your turf open to the other four.

That's why complete coverage pays. And only Rubigan is labeled to prevent and treat all five of these pathogens that cause patch disease.

Not to mention dollar spot, snow mold, copper spot, red thread and stripe smut. And this spring is an excellent time to begin your preventive program.

Why take chances controlling only part of the patch disease problem? Span the spectrum with Rubigan. See your Elanco distributor. Or call toll-free: **1-800-352-6776**.

Two from Cushman are liquid-cooled

Cushman offers the green industry

two new utility vehicles with liquid-cooled engines.

The "Turf-Truckster" vehicles have OHC gas engines that develop 26 hp at 3,600 rpm. Cushman engineers believe the three-cylinder, liquid cooled engines offer increased performance, quieter operation and extended service life.

The Model 630 is a three-wheeler. The Model 632 has four wheels. Both have a rated capacity of 1,900 lbs.

Cushman reports the new models are vastly improved, featuring a higher capacity, automotive type clutch, automatic choke, an improved heater/defroster with high-output heater, more foot room and a redesigned dash/instrument panel.

An optional live hydraulic system

includes a remote hydraulic capability for operating attached equipment. Many attachments and accessories are available.

The NEW generation of Dixie Mowers, with their full hydrostatic drives, set a new standard of excellence for the mowing industry. These are not only the fastest, most powerful mowers available, but as commercial operators will testify, they are more productive and cost effective than other mowers. With zero turning radius and 6.5 mph mowing speed, these compact Dixie Mowers offer an unbeatable combination of maneuverability for operation around trees and in tight places, and high-speed, quality cut mowing. In terms of heavy duty construction, reliability, comfort, ease of operation and maintenance, Dixie Chopper Mowers are built to meet the standards for commercial cutting operations. Before you buy — try a Dixie!

Why Betasan is trusted most by the best.

"I feel comfortable using it on my tees and greens, because it doesn't damage the bent-grass. I just wouldn't feel as comfortable with anything else."

—Peter Smith
Shinnecock Hills Golf Club
Southampton, NY

"We've been using it 18 years. We get good control, with no safety problems. And it spreads well, so we don't miss spots."

—Bob Randquist
Southern Hills Country Club
Tulsa, Oklahoma

"We've had excellent results with it for about 20 years. It gives us surefire crabgrass control and it's entirely safe. We've had no problems with it, period."

—Bud Best
Oak Tree Golf Club,
Edmond, Oklahoma

"We've been using it for 10 years. Quite simply I think it's the best and safest product to use on bentgrass. University testing has proved that it's the most effective and least damaging."

—Peter Wilson
Medinah Country Club,
Medinah, Illinois

For over two decades an overwhelming majority of the country's top courses have chosen BETASAN® herbicide for their bentgrass greens, tees and fairways. That's because golf course superintendents know that BETASAN is the only crabgrass preemergent herbicide that's safe for all turf—including established bentgrass, bluegrass, fescue, perennial and annual rye, bermudagrass, Zoysia, bahia, centipede and St. Augustine.

Extensive tests have shown BETASAN to be excellent for poa annua control, too.

But don't just take our word for it; ask your colleagues at the country's top courses.

We are as confident in their answers as you can be in BETASAN.

Incidentally, it's available in both liquid and granular formulations to match any application need you may have.

For more information, contact your local supplier or call ICI Americas at 1-800-759-2500.

BETASAN

Trusted most by the best

BETASAN is also marketed professionally under the trade names Bensumec, Pre-San and Lescosan

neered with special low-speed gearing and a tight turning radius combined with sturdiness and ease of operation.

According to Yamaha, the Pro-Hauler chassis is longer and wider than the conventional all-terrain vehicle chassis. A 59.1" wheel base supports a heavy cargo load while a lockable differential keeps the turning radius at a snug 8.4' and reduces turf damage.

Electric start, automatic clutch, reverse gear and an 800 lb. capacity hitch are standard.

AMT fleet addition loaded with features and options

The AMT 622 is the newest addition to the John Deere fleet of five-wheel utility vehicles.

The 10 hp transport features a steering wheel, foot accelerator and brake pedal instead of handlebar controls. Dual headlights are standard. Options include tail and brake lights, turn indicators, horn, hour-meter and electro-hydraulic dump.

Four-wheel drive with differential lock provides extra traction in wet

ground, and high-floatation tires minimize ground compaction. Variable speed transmission requires little operator training.

Kawasaki's Mule 1000 first of micro trucks

The Kawasaki Mule 1000 is described as a "true hybrid" in the utility vehicle market. The vehicle hauls quarter-ton loads in the bed and two

people up front. It goes anywhere thanks to a low center of gravity, independent suspension and off road tires.

The Mule is powered by a 454cc, four stroke, liquid-cooled Kawasaki engine. A dual-mode differential is optional. With a flip of a lever, the operator can lock the differential so both rear wheels turn together for maximum traction. Unlocked, the wheels provide a tighter turning radius and minimal soil disturbance.

Hydrogel helps water remain in soil

Viterra Gelscape is a granular, organic, super-absorbent hydrogel designed to increase the water-holding capacity, drainage and aeration of soils. When properly applied, Viterra has proven capacity to re-absorb many times without losing its strength, says Aglukon, which manufactures the product.

Gelscape is perfect for hydroseeding, according to Aglukon sales manager Bill Stinson. It can be applied in combination with fertilizer, mulch and seed at rates of 4 to 24 lbs. per acre. It can also be used in tree and shrub planting to promote healthier plant roots.

Gelscape granules have the ability to absorb more than 200 times their weight in water. The water is then gradually released to the soil and plants, reducing the possibility of plant damage due to moisture stress. **Circle No. 213 on Reader Inquiry Card**

Count the features on new cutting head by Snapper

New from Snapper Power Equipment is the Fixed Line Cutting Head, with easy feeding and threading. The glide ball has replaceable wear pads to prevent scalping by allowing the head to glide along the ground above the grass.

A bundle of 50 pre-cut 16-inch lengths of .105 diameter line is standard.

Additional packages of .095, .105 and .130 diameter lines are available in a convenient carrier that at-

taches to the operator's belt or the machine. The tool features easy feeding of the monofilament lines without loosening bolts of tricky threading through alternating holes. This allows quick line changing by the operator.

Tough Transport

...FROM THE TRANSPORTER SERIES

To get your business moving you need good equipment and that means the Transporter Series. These rigs are designed and constructed to outperform, outlast and outclass all other carriers on the market.

The Transporter offers an optional rear stabilizer with powerful front hydraulics to give you height and angle flexibility for a variety of applications. With this option you can stabilize your payload at any time during a pick up, making for safe and successful operation.

And when you order a Jerr-Dan Transporter, you won't pay for unnecessary weight capacities* or options, because we design each truck individually to meet your needs. What you will pay for is a first-class carrier to give you premium performance over the long haul.

EXCLUSIVE JERR-DAN PROGRAMS

We don't just claim to have the most durable carriers on the market, we guarantee it with

the industry's only extended 3-year warranty: the Gold Star Protection Plan.

We also offer Jerr-Dan **REDLINE** Parts Service, a replacement parts service that guarantees your parts are shipped within 48 hours of your call, or they're free**. And Jerr-Dan provides exclusive single source leasing to give you highly competitive rates that eliminate the hassles of dealing with third-party financial institutions or leasing companies. So call 1-800-248-6000 or 1-800-842-4000 in Pennsylvania now for a free demonstration and get your business moving today.

*The payload carrying capacity of any truck is determined by the G.V.W.R. of the cab chassis, the curb weight of the cab chassis and the weight of the body. It is important that you determine that your truck has satisfactory carrying capacity and axle ratings for specific applications. Jerr-Dan's authorized sales representatives are available to assist you in this regard.

**Free parts offer is on current models only. While we attempt to maintain an inventory for all models back seven years, some units no longer in current production require fabrication prior to shipment and therefore do not qualify. Contact your parts representative for assistance.

HEADQUARTERS 1-800-248-6000, PA only 1-800-842-4000. Other offices located in St. Louis, MO., Chicago, IL., Atlanta, GA., Cincinnati, OH., Los Angeles, CA., Dallas, TX., In Canada, H.R. Runciman & Co., Ltd.

Spotseeder attachment makes reseeding easy

Ryan's Ren-O-Thin Spotseeder simplifies reseeding of bare spots, damaged turf and smaller yards.

The seeder mounts on the front of

the Ren-O-Thin, and the Spotseeder drive wheel engages the front wheel and activates the seeder.

The Spotseeder hopper holds up to 25 pounds of bluegrass seed, depending on seed density. An adjustable metering gate works well with any type of grass seed. Seed openings are spaced every 1/2 inch, on centers, to assure good seed coverage.

The Ren-O-Thin Spotseeder is available ready-mounted as a factory model, or as an attachment for existing Ren-O-Thin III and Ren-O-Thin IV models.

Barricade chosen as the name for new weed control

Sandoz Crop Protection announced Barricade as the trade name for pro-diamine, a new herbicide for turf and ornamentals.

Barricade provides long residual control of grasses and broadleaf weeds and is expected to be registered for turf uses in 1990, says Mark Busch, Sandoz's marketing manager.

Field trials have shown the product to be effective on crabgrass, goosegrass, poa annua, prostrate surge, chickweed and other broadleaves, with residual control ranging from 10 to 12 months, according to the manufacturer.

Circle No. 218 on Reader Inquiry Card

Seven Great Reasons To Use Pre-San[®] For Weed Control:

- 
1. Superior pre-emergence control.
 2. Controls crabgrass, Poa annua, goosegrass, other annual weeds.
 3. Proven effectiveness.
 4. Long-lasting—up to four months protection.
 5. Liquid or granular formulations.
 6. Safe for all established turf on golf courses, home lawns, parks.

7. FREE! Get an authentic Swiss Army knife when you purchase a minimum of \$250 of PRE-SAN pre-emergence herbicide products. Send your name, address, and a distributor invoice (copy ok) to Sierra, 12101 Woodcrest Executive Drive, #190, St. Louis, MO 63141. Offer only good while supplies last, so order PRE-SAN now for superior weed control and pocket your free PRE-SAN Swiss Army knife.

Reroute roots and the ugly side of you

Introducing Typar® Biobarrier™ root control system.

Give unsightly roots a new direction in life. Down. With new Biobarrier, the advanced root control system that sends your maintenance costs in the same direction.

Biobarrier combines two of the most effective, longest-lasting elements in root control. One is Treflan®, one of the most proven herbicides in the country, featuring new controlled-release pellet technology. The other is Typar® fabric, made with rugged polypropylene geotextile that's porous enough to let air and water through but holds the Treflan pellets in place.

Together, they reroute roots without harming your trees and plants. And preserve the beauty of your landscaped areas — golf greens, cart paths, sidewalks, curbs, walkways, parking lots, swimming pools, gardens and others — for years to come.

For 15 years or more.

Underground, Biobarrier sets up a solid rootproof zone that spans one to two inches on each side of the fabric. That's the Treflan controlled-release vapor zone. A zone so powerful, it repels roots at a controlled rate for 15 years or longer.

Top Without Biobarrier, tree roots penetrate paved surface and aggregate base, causing unsightly cracking and heaving.

Bottom With Biobarrier, a protective zone of Treflan vapor reroutes roots downward without harming roots or tree.

For half the cost or less.

By rerouting roots downward, Biobarrier protects your golf greens, cart paths, tennis courts, swimming pools and other recreational areas from unsightly roots. And helps keep your reputation in good standing among your customers.

ame r landscape.

The cost savings are just as dramatic. Over 50%, in fact, during Biobarrier's lifespan.

Without Biobarrier, you're spending plenty to trench, trim roots and replace damaged landscaping. And it has to be redone often to protect greens, cart paths and other landscaping.

But with Biobarrier, you'll only do the job once every 15 years — trim roots, replace damaged cart paths and install Biobarrier.

Easy on plants and landscaping.

Unlike other root control methods, Biobarrier won't harm trees or nearby landscaping. It doesn't kill roots, it just reroutes them away from your golf, recreational or landscaped areas.

Treflan's active ingredient is biodegradable. It can't be taken up by plant systems. And it stays put without leaching to keep rerouting roots for 15 years or longer.

Easy to install.

The Typar fabric in Biobarrier is flexible to make installation simple. Just install vertically along your golf, recreational or landscaped areas where tree roots threaten to bring out the ugly side of your landscape.

Call toll-free.
