

THE RYES OF THE TIMES

These are demanding times. Your turf has to look better than ever, but maintenance costs are rising and the pressure's on to respect the environment.

Lofts has four ryes that can meet today's tough demands. Each has its own unique advantages:

- **Repell** contains endophytes that repel above-ground feeding insects naturally. It needs no chemical control for insects like sod webworms, cutworms, chinch bugs, aphids or billbugs.

- **Palmer and Prelude** feature heat and drought tolerance and excellent dark green color.

- **Yorktown II** is exceptionally cold tolerant for northern areas, yet it also tolerates hot, humid summers.

From each of the four rye varieties you'll also get many additional benefits, including fine-leaved dense growth, excellent mowability and above-average disease resistance.

Repell, Yorktown II, Palmer and Prelude — alone or together — they meet the needs of these demanding times. Good looks with less maintenance for minimum environmental impact.
