

# UPWARD MOW-BILITY.

## Positive, non-slip drive.

The true test of any grounds maintenance tractor is uphill mowing—especially on wet grass. The Cub Cadet GMT—with positive final wheel drive—has

the consistent power to handle steep grades and wet turf. No slipping. No sliding. Just upward and onward.

## Oversize grass-gripping tires.

When the going gets wet, you'll really appreciate Cub Cadet's 16" diameter x 7.5" Turf Tread tires that deliver outstanding traction

and stability. When the going gets rough, you'll like our pneumatic front tires with a built-in puncture sealant that helps prevent flats.

## The tough machine that does it all.

Choose from three powerful engines: 8.5 HP, 12.5 HP, 15 HP. Full-pressure lubrication for hillside cutting. Unique planetary 5-speed transmission that provides no-stop, no-clutch forward/reverse shifting. Power unit converts to a snowthrower, sweeper, dump cart, shredder/chipper, sprayer, and more—for year-round utilization.

Grounds maintenance doesn't have to be an uphill struggle. Switch to a powerful Cub Cadet GMT. It makes molehills out of mountains.
