

# THREE...TWO...ONE!

## THREE GREAT ASSOCIATIONS...

You asked for it, and now its here - Nov. 12-15,1990! One Show for the lawn/landscape industry starring the "big three" of the industry -- the Professional Lawn Care Association of America, the Associated Landscape Contractors of America, and the Professional Grounds Management Society, have combined their separate annual exhibitions into one grand showcase of products. Green Industry Expo/90 does away with the old 'Which Show offers the most for my business?' decision. Now there is **one** Show, bigger and better than ever, and your best opportunity to see all that's new.

## TWO GREAT CONFERENCES...

Green Industry Expo/90 offers TWO separate conferences and educational programs to choose from. Register and attend the program that targets the specific needs of your business:

### Professional Lawn Care Association of America

The 11th Annual PLCAA Education Conference will have a wide variety of topics including: Business Problems-Solving, Customer Satisfaction, Employee Retention, Health & Technology, Ground Water Issues, Management Techniques, Effective Pest Control Programs, Landscape Services, and Business to Business Roundtables.

Keynote Speaker Michael LeBoeuf talks on 'Winning Customers and Keeping Them for Life.' Mail the coupon below today for details and registration information.

### Landscape and Grounds Management Conference

This year's ALCA/PGMS Landscape and Grounds Management Conference features the latest information on a multitude of topics including: Training for the '90s, Customer Service, Plant Material That Warrants Attention, Maintenance and Cost of Utilizing Wild Flowers, Sports Turf and Strategies to Increase Your Bottom Line. The Keynote speaker, Allan Cimberg, will give a presentation, 'How to Sell in Tough Times to Difficult People.' Mail the coupon below for more details and registration information.

## ONE GREAT SHOW!

- Largest Lawn/Landscape Show Ever
- Over 200 Exhibitors! • Giant Outdoor Equipment Demonstration • Early Bird Reception • Spouse Program
- New Product Showcase

**Tell me more about Green Industry Expo/90!**

For consideration contact David Gorter, 855 Skokie Highway, Lake Bluff, IL 60044. 708-615-0800. 7/90

# To the floating deck Crew King™, this is a walk in the park.

- Available in 36" and 48" cutting widths.
- Fixed deck units also available.
- Heavy duty 10 gauge decks with 7 gauge skirts.
- Rigid bumper system on fixed deck units.
- Powerful, 14 HP Kohler overhead valve, 4 cycle engine on floating deck models.
- Reliable, 12.5 HP Kawasaki engine on fixed deck models.
- Large, 4.25 gallon fuel tank to minimize refueling time.
- Top-lube, easy-access blade spindles for simple maintenance.
- Low profile, heavy duty caster struts for better access under bushes and benches.
- Long life, smooth casters for less turf marking.
- Double-A drive belts for better traction.
- Neutral starting safety controls.
- Floating decks have wide reinforcing bar on deck perimeter for strength and to prevent turf gouging.
- 48" deck model has a center anti-scalp roller and skids for added turf protection.

Smooth out your tough jobs with the new 36" and 48" Crew Kings.

For a better quality cut, a floating deck is suspended from the carrier frame, allowing the Crew King to follow ground contours closely and prevent scalping and blade damage.

For better productivity, the new Crew Kings are packed with time-saving features. Quick change cutting height adjustment requires little effort and no tools. Just pull a few pins, set the cutting height and continue.

Five forward speeds accommodate a wide variety

of mowing conditions. Reverse gear makes access to tight areas easier, including trailer unloading. And a zero turning radius at the wheel provides excellent maneuverability without scuffing turf.

Crew Kings also have proven-tough Jacobsen decks, built to take the hard knocks of everyday work.

The new Jacobsen Crew Kings help turn any day into a walk in the park.

See your Jacobsen Commercial Products dealer today for a demonstration.

**JACOBSEN**  
**TEXTRON**

Jacobsen Division of Textron Inc.

**G**UARANTEED PERFORMANCE\*!

Now...

# There's an AquaGro® Formulation That Fits Your Needs ...and Budget.

## Four Flexible Formulations

**W**e've added convenience, economy, our money-back performance guarantee\* and flexibility to the list of AquaGro® features. The world's most popular soil wetting agent is now injectable, syringeable, sprayable and spreadable.

*Whether it's too wet, or too dry, put AquaGro to work for you.*

## Aquatrols Has A Solid Advantage

**A**dvantage is AquaGro molded into a solid pellet. Instead of syringing with plain water pop in an Advantage Pellet and apply a supplemental shot of AquaGro.

AquaGro Advantage pellets are economical... each pellet treats up to an acre and costs about \$7.00. And Advantage offers more than twice the active ingredient of other wetting agent pellets. *You can't beat the AquaGro Advantage System for ease-of-use and turf safety in any weather.*

## AquaGro Injectable The Future Is Now

**T**here's a growing trend... superintendents are injecting soil wetting agents into their irrigation systems to improve irrigation efficiency, turf uniformity and to save labor.

AquaGro Injectable combines AquaGro's proven performance with economical and flexible application rates. Now you can get AquaGro benefits everywhere you irrigate. Injectable—a 33 percent active ingredient formulation—pumps easily through all available injection systems.

Install an Aquatrols Little Squirt flow regulated injection system, or the P.P.M. fixed pulse injection pump, and *put AquaGro Injectable on tap at the touch of a switch.*

*For more information about the AquaGro formulation that fits your needs... and budget, call 1-800-257-7797*

**AQUATROLS**

The Water Management People  
1432 Union Avenue, Pennsauken, NJ 08110  
Fax: 609-665-0875

## AquaGro • L For Max Performance

**E**veryone is talking about saving water... AquaGro • L (Liquid) has been helping superintendents do just that, and much more, for over 35 years.

AquaGro • L—the standard by which other wetting agents are judged—gives you the power of its 100 percent active blend of wetting agents.

*AquaGro • L gets to the root of your water related problems.*

## AquaGro • S Beats The Heat

**R**egardless of the weather you can apply AquaGro • S (Spreadable) with safety and confidence. The perfect complement to any AquaGro formulation, AquaGro • S offers the same high level of performance as AquaGro • L.

*When the heat is on AquaGro • S helps you make the most of available water.*

Circle No. 101 on Reader Inquiry Card

\*Aquatrols guarantees you will be satisfied with the performance of any AquaGro formulation, when used as directed, or your money back. Simply send proof of purchase and a brief reason for dissatisfaction to Aquatrols.

Roker 40" Tree Spade - \$3800. Hydrobrute 30" Tree Spade - \$2500. Lindig Soil Shredder - \$19,500. All in good working condition, ready to go to the field. **CLOVERDALE NURSERY**, Boise, ID (208)375-5262. 7/90

**NEW and USED EQUIPMENT**--Asplundh, Hi Ranger and Lift-all forestry bucket trucks, Chipmore wood chippers. Mirk, Inc., (216)669-3567, (216)669-3562, 7629 Chippewa Road, Orrville, Ohio 44667. TF

# UNIPAR BUNKER AND SOIL DRESSING SANDS

- High quality silica sands from the nation's largest producer.
- Consistently uniform grades meet particle size recommendations established by the USGA.
- Chemical purity, pH neutrality and low clay content guaranteed.
- Improve bunker construction and soil aeration while enhancing course beauty.
- Call Customer Service for nearest source and pricing.

### BOSSARD from page 19

calcine clay should be used on a typical softball field, 14 tons on a high-quality baseball infield like his. "Make sure you have a minimum four inches of soil as a base," he says.

The existing park has a bluegrass infield cut to 7/8-inch, by edict of the White Sox hitting coach. It is cut every day; Ferromec and eight pounds of nitrogen per year are used to keep it green.

The new park's outfield, which will be a mixture of seven cultivars, will be cut at 1 1/2 inches, same as the existing park.

To combat fusarium and pythium, Bossard applies Subdue fungicide the first or second week in June and Alliette fungicide three weeks later. The only other pesticide he mentions in casual con-

versation is Daconil, which is used late in the season for snow mold control. This season, he is remaining true to his program, except for the Daconil application which will be made only if the Chisox make the AL playoffs.

Once the new park is opened, it will be business as usual, just as it was for his grandfather Emil, his father Gene, his uncles Harold and Marshall, and his cousin Brian (now at Yankee Stadium). There was never a doubt in Roger's mind that this was meant to be.

"I can remember being five years old and pretty much knowing what I wanted to do," he notes. "And today, I'm doing exactly what I want to do, and I'm getting paid for it."

FLORIDA TURFGRASS ASSOCIATION  
**Annual Conference and Show**

September 30 – October 3, 1990 ♦ Orlando, Florida  
Orange County Convention/Civic Center  
Sheraton World Resort — Convention Hotel

**TURFGRASS PARADISE — FTGA '90**

With the cooperation of University of Florida, IFAS

**The Largest Warm Season Turf Show  
in Southeastern United States**

Exhibiting 100,000 square foot showroom of  
Equipment, Products and Services for Turfgrass Managers

**EDUCATIONAL CONFERENCE**

Eight different Hands-on Workshops and three Concurrent Educational Seminars for Warm Season Turfgrass Professionals — managers and their employees — include: ♦ Identification & Recommendations for Control of Insects, Disease, Weeds and Nematodes ♦ Current Pesticide Regulations — Stewardship, Movement in Soil, SARA Title III, Right-to-Know ♦ Industry Trends — Water Restrictions, Computer Usage, Biological Control, Xeriscape, Controlled Release Fertilizer ♦ Advanced Plant Pathology and Nematology ♦ Irrigation Design, etc. for better water management ♦ Putting Green and Athletic Field Construction ♦ Turfgrass Growth Responses to the Environment ♦ Basic Hydraulics for Golf Course Equipment ♦ DACS Pesticide Licensing — Training and Equipment

Continuing Education credits will be offered.

Call for brochure and registration information.

# PROBLEM MANAGEMENT

by Balakrishna Rao, Ph.D.

## No bark vs. chem studies

**Problem:** Have there been any studies published comparing the cost of edging with bark vs. chemical controls? (California)

**Solution:** I am not familiar with any published data comparing the effectiveness of edging with bark or chemical controls. However, the following discussion might be helpful in considering these practices for edging problems.

Edging is generally done around flower beds or where turfgrass meets the concrete sidewalk, driveway, etc. In these situations, most professional landscape managers prefer to use either a string trimmer or mechanical power edger. In some situations, a non-selective herbicide such as Roundup is used.

Roundup should be used carefully since it will kill any vegetation upon contact. Some professionals like to use Monsanto's Expedite system with a long wand, which allows good trimming and edging near difficult areas. This system may not be suitable around highly visible quality turf because the treated area will brown out with dead turfgrass, which could be objectionable. In these situations, the string or power edger would be desirable.

## Maintaining soil structure

**Problem:** Will the carrier Balan or Ronstar G change to soil pH or structure? (California)

**Solution:** No. Representatives from Elanco Company, the manufacturer of Balan, and Rhone-Poulenc, the manufacturer of Ronstar-G, indicate that this product does not change soil pH or structure.

I also believe that if the products are applied to the label specifications, there should not be any adverse effects on soil property.

## Late-season fertilization

**Problem:** My late-season fertilizing program consisted of a granular application of 32-3-10 with a water insoluble percentage of 7.7 percent nitrogen at a rate of 1.5 AI/acre. With the exception of a very cold December, we had a very mild winter with an abundance of rainfall. I am concerned that the turf's protein and carbohydrate reserves are depleted and that normal spring green-up and root growth will be reduced. Could this happen and, if it does, would I have to make a supplemental application in early spring to make up for the lost nitrogen? (Ohio)

**Solution:** Even though we have experienced above-normal temperatures during February this year, lawns are still dormant because soil temperature didn't stabilize above 50°. Also, even though we had high temperature days, it was not enough to stimulate leaf growth.

Based on temperature extremes experienced in your area, I don't think it's necessary to provide a

supplemental application in early spring to make up for the nitrogen loss due to leaching and/or plant use.

It is not advisable to provide an early spring application of nitrogen, particularly since you fertilized late in the season. This application would stimulate a lot of leaf growth in the spring as dormancy breaks.

After checking the condition of the turf in spring, apply whatever low rates of fertilizers you feel you need for green-up.

## Keeping large plants mobile

**Problem:** I work in a large office building in which we have approximately 75 large plants along a main concourse, each weighing about 200 lbs. The concourse is used at least twice a month for various activities and plants must be removed each time. It's a long, hard process because of the weight and height of the plants. Is there a method or type of container that would make this job easier? (Ontario, Canada)

**Solution:** I can see where transporting such large plants would be time consuming and laborious. There are a number of containers designed for easy moving, including ones with recessed bottoms to fit casters.

If your containers have flat bottoms, casters may not fit underneath and slip off. Since casters under a recessed container are not obvious, they could be left in place.

Take care to select casters for the weight you are dealing with, which is generally based on the container's diameter. Each caster would hold approximately 50 lbs.

Another solution would be for you to make your own platforms with heavy-duty wheels to place and secure the plants in position during frequent moving operations.

# Avoid Running Into Problems.

Announcing a turning point in mower history. The Reelmaster® 216 from Toro. It's nimble. Lightweight. And extremely maneuverable. Perfect for mowing around trees, signs, any obstacle standing in your way. And perfect for formal mowing and cutting on slopes.

For added performance, traction and versatility, the Reelmaster 216 features 3-wheel drive. Plus quick-adjusting height of cut. Options include grass catchers and a choice of front rollers that let you adapt easily to varying needs.

The Reelmaster 216 is so easy to operate that anyone can become an expert on the first ride. One lever controls the cutting reels. One pedal controls the forward and reverse speeds and the braking. It's that simple.

For all-purpose mowing, there's nothing as agile as the Reelmaster 216 from Toro. It's a great way to steer clear of trouble. For a demonstration, call your local distributor or contact Toro at the address below.
