Troubled waters?

Otterbine Aerators

The prescription for troubled breathing, poor circulation, and changing temperatures in ponds and lakes is practical engineering that is esthetically pleasing.

These aerators range in power, circulating from 600,000 to 20 million gallons of water in a

24-hour period. Each complete, turnkey system is delivered fully assembled; no special pumps or foundations are required.

Striking patterns begin with the Starburst, Rocket, Sunburst, Constellation, or Phoenix working alone or mingled together. Add the Otterbine Fountain Glo™ lighting system for spectacular evening display as well as security or the Rock Float Cover for the illusion of natural spray.

Otterbine Aerators meet the water management needs of golf courses, parks, recreational lakes, office developments, and residential condominiums. Call or write for more information:

Barebo Inc.

GREEN INDUSTRY SHOWCASE

Two for the snow: to help clear your way through the toughest winter conditions

Honda and Jacobsen—though two distinctly different companies—do have one thing in common: they like to move snow, and have the equipment to do it.

Two models recently introduced by the companies—one an attachment, the other a walk-behind—promise much in the way of snow removal.

From Honda comes the self-propelled, two-stage HS828TAS snowblower, now with a hydrostatic drive system.

The hydrostatic drive—which Honda says it pioneered for snowblowers—gives the unit many variable speeds for any type of snow condition. Controls are conveniently located and easy to use. One-hand operation with integrated drive and auger clutch controls leaves the other hand free to make discharge chute and speed adjustments.

The engine features a cast iron cylinder sleeve and ball bearing-supported crankshaft for durability. Standard equipment includes a 120-volt electric starter and recoil start.

Two-way adjustable discharge chutes with a 210-degree discharge radius allow the operator to choose a variety of directions for discharging snow.

The HS828TAS's dual track drive provides excellent traction, and a new serrated auger with all-metal housing cuts right through the hard-packed snow.

The auger clutch system allows the operator to stop the auger after releasing the clutch lever. Powered by an eight-horsepower Honda four-stroke OHV commercial engine, the snow blower will clear a 28-inch wide path and throw snow as far as 49 feet.

Jacobsen Division of Textron snow throwers attach to the Jacobsen Turfcats or G-4x4 Plus, ST-5111 and HR-5111.

Turfcats attachments cut a 51-inch swath. The rated capacity is 120 tons/hour. Hydraulic or mechanical drive are available. Auger diameter is 14-inches.

The G-4x4 Plus, ST-5111 and HR-5111 attachment cuts through 63-inch wide snow trails, and is also rated at 120-tons/hour. Two drives—hydraulic or mechanical—are also available.

All Jacobsen snow throwers have a quick-hitch system that allows implements to be changed in a matter of minutes with no tools.

Each has a two-stage design, and a 10-gauge steel housing reinforced at the wear and stress points.

The auger does not extend beyond the housing.

Honda's HS828TAS has a cast iron cylinder sleeve and ball bearing supported crankshaft for durability. Standard equipment includes a 120-volt electric starter and recoil start. Circle No. 190 on Reader Inquiry Card

Jacobsen Turfcats attachments cut a 51-inch swath. Rated capacity is 120 tons/hour. Circle No. 191 on Reader Inquiry Card

The fight against yellow nutsedge begins here.

Only Basagran[®] T/O ends it here.

Unlike other herbicides which only burn back yellow nutsedge above the surface, Basagran T/O herbicide travels down to control the roots, rhizomes and tuber network underground. It's the only way to be sure those same weeds won't come back.

An over-the-top application is all it takes to win the fight against yellow nutsedge and broadleaf weeds. (A second

application is recommended when re-growth occurs.) And while it's tough on weeds, it's easy on virtually all varieties of established turf.

Basagran T/O is also labeled for directed sprays in ornamental varieties.

For more information on how to control yellow nutsedge and broadleaf weeds with Basagran T/O, call **Toll Free 1-800-878-8060.**

Always read and follow label directions.
Basagran is a registered trademark of BASF AG.

Job applicant screening covers 5 major areas

Wells Fargo Investigative Services offers the landscape/golf industries its Five Star Pre-Employment Screening Program. The Wells Fargo screening program—

the same one used to screen its thousands of guard applicants each year—includes the following five elements:

- county criminal record check;
- state driver's license record check;
- consumer credit report;
- Social Security search;

previous employment verification.

The company gives a 72-hour turnaround on applicants screened. It also offers custom-designed reports to meet your specific requirements.

All-purpose fungicide in easy-to-use packets

Duosan WSB (Water Soluble Bags) is an all-purpose turf and ornamental fungicide from Grace-Sierra Horticultural Products Company.

Duosan WSB gives turf managers ver-

satile, broad spectrum disease control in a safe, easy-to-use pre-measured form.

Group marketing manager, Mark Broxon, says Duosan eliminates the need to purchase, store, re-load and use multiple fungicides at one time.

Duosan WSB is labeled for use on turf, ornamentals, trees, shrubs and flowers and provides broad spectrum control of most turf and ornamental diseases. It contains a contact and a systemic fungicide.

Software keeps records in compliance with regs

Environmental Compliance Systems, Inc. has created an innovative software program that keeps chemical inventory records and transforms them into governmental compliance reports.

The "Superintendent's Compliance/Management System" can be used by superintendents or other chemical users for chemical inventory, application reporting, Hazardous Communication programs and employee safety and training records.

Pop-up lists and easy key functions allow new computer users to quickly become proficient with this powerful software. Full financial report generation, modem capabilities, tree inventory, and scheduling are included.

Options include architectural drawings on your computer. Print function available if adaptable to user's printer.

New greensmower warns rider of oil leaks

The Toro Company announces the roll-out of the Greenmaster 3100, engineered with the "Turf Guardian" leak detector

Toro reports that the hydraulic oil leak detector can warn of leaks as small as five ounces, to prevent major damage to the appearance and playability of the green. The Greenmaster 3100 is called the lightest mower in its class, designed to minimize turf compaction.

The 3100 provides a single-lever, quick-adjust steering arm designed to accommodate different-sized riders and steering styles. All instrumentation is conveniently grouped on one side. The mower is powered by a 16-hp Vanguard engine.

Circle No. 199 on Reader Inquiry Card

sis (B.t.), Steward is active against certain lepidopterous species, including armyworms, cutworms, loopers and sod webworms. It also controls bagworms, budworms, gypsy moths, leafrollers and tent caterpillars, according to the company.

Ron Fister, director of turf and ornamental sales, says Steward is safe to predator insects. There is no pre-harvest interval or re-entry restriction for workers, and residual activity is seven to 10 days.

Circle No. 194 on Reader Inquiry Card

Shuttle car perfect for resorts, touring

Columbia ParCar's Shuttle is a comfortable way to move people and equipment efficiently and safely.

The Shuttle features a 2-cycle Columbia engine, which does not require an oil change. The electric model comes

with a lift-out battery pack tray for continuous use and an on-board automatic electric charger.

State of the art features like Columbia's speed balanced rack-and-pinion steering give the Shuttle superior maneuverability and steering capabilities. The front body is constructed of metton, a synthetic space-age plastic, to assure users of a durable, long lasting front body and many versatile uses.

A trunk is optional.

Circle No. 195 on Reader Inquiry Card

Hydroseeding software calculates all job costs

Erosion Control Technologies has introduced an IBM-compatible software package designed for hydroseeding projects.

The Hydro Seed Cost Estimator item-

izes and calculates materials, labor and equipment costs for each estimate. As the user selects each element of each cost category, costs are sub-totaled and converted into: dollars per acre, center per square yard and cents per square foot.

Any miscellaneous costs may also be added or removed from the estimate at any time.

Variables include: job size, cycle time, travel time and pump-out time.

Package includes materials management, equipment maintenance, work order reports, user manual and on-line "help facility."

Circle No. 196 on Reader Inquiry Card

Tractor available with diesel, gasoline engines

Walker introduces the new Model D tractor with a water-cooled, three-cylinder Kubota engine, available in either 16.5-hp or 21-hp gasoline versions.

Designed for heavy commercial service,

this model features compact dimensions and a powerful, long life, industrial engine.

Walker offers other compact and maneuverable mid-size rider mowers for commercial operators and owners of large homes.
