LANDSCAPE MANAGEMENT

...it's all you really need!

PASS IT ON!

For 30 years, Landscape Management has been your Green Industry source for Business Management "How-To" Technical Information, and Industry News.

Now that we include Lawn Care Industry's coverage of the LCO segment, you have more reasons than ever to read LM and... **PASS IT ON!**

Your crew, a partner, technicians or even customers... LM's editorial, useful, timely and understandable will help you and other professionals with your work, and in promoting the benefits of healthy attractive turf.

Now, landscapers everywhere can be good in beds.

Introducing PENDULUM™ from American Cyanamid, the preemergent for outstanding over-the-top weed control at an unbeatable price.

It doesn't take much effort, time, or expense to be good in beds these days. Not when you have a little help from new PENDULUM™ WDG herbicide.

PENDULUM is a preemergent herbicide that gives you excellent weed control—without the weeding. It's highly effective against most annual grasses and many broad-leaf weeds, controlling them as they germinate. Before they become a problem.

At the same time, new PENDULUM is gentle on your bedding plants. Just spray it over the top of established trees, shrubs, even sensitive flowers and ground covers.

Its active ingredient, pendimethalin, can be applied safely to labeled ornamentals for proven performance and consistent results.

And, because PENDULUM costs less per treatment than Surflan¹ and other preemergents, you get highly cost-effective control all season long.

This season, try new PENDULUM, for over-the-top weed control that will make you good in beds.

Green industry faces uphill battle in Washington, AAN official says

'The more Congress does, the more likely it'll be doing it to you.'

OXFORD, Ohio—Ben Bolusky of the American Association of Nurserymen (AAN) thinks that the green industry has its hands full in the coming months.

"We have a lot of positive momentum in Washington, but we may run out of time this election year," Bolusky told members of the Professional Grounds Management Society (PGMS) and the Midwest Association of Physical Plant Administrators (MAPP) here last month.

"The reality is, we may need to start all over in January with a whole new Congress," Bolusky pointed out that at least 71 members of Congress are retiring and—given the current unrest of American voters—many more incumbents could be voted out in November.

"The green industry will have a big re-education effort come January," he noted.

According to Bolusky, 110 cities and counties have already imposed their own pesticide application laws, following the *Wisconsin Public Intervenor v. Mortier* Supreme Court decision last summer.

"The potential for chaos is mind-boggling," Bolusky said. "Our pesticide regulatory system is in jeopardy if regulations are fueled by emotion. Few localities are qualified to regulate pesticides."

He said H.R. 3850 approved by the House Agricultural Subcommittee last

month would keep pesticide regulation at the federal and state levels: "The house bill has attracted 93 co-sponsors, and 23 senators have added their names to the Senate version (S. 2085) of the bill."

Another proposed pesticide bill, being readied by Sen. Joe Lieberman (D-Conn.) has been amended. The re-draft, if passed, would:

1) Force individual states to establish a registry of pesticide-sensitive individuals.

2) Force pesticide applicators to notify everyone on the list (within 800 yards), plus immediate neighbors, of the season's first pesticide application.

3) Force posted notices three days before, remaining three days after, pesticide applications.

4) Would apply to all pesticide applications, including those done by homeowners. Stores where pesticides are sold would also sell appropriate signage.

In addition, Bolusky noted, "The EPA's Lawn Care Advisory Committee is considering an *à la carte* menu of pesticide regulations."

Not all the news from Washington is bad, Bolusky admitted. Sen. Don Nickles (R-Okla.) has introduced S. 2319, which

will require an economic impact analysis on subsequent federal legislation. Such a bill could affect proposed pesticide regulations. "He's seeking some degree of accountability," Bolusky said.

Also, President George Bush has penciled \$31 million for urban tree plantings into his 1993 budget request. This is about 15 times what was spent in 1992, much of which will go to landscapers who are contracted to plant trees in urban areas.

The AAN executive made his remarks as part of a keynote at the Midwest Grounds

Management Conference sponsored by MAPP and PGMS at Miami University.

Bolusky concluded that he is sometimes frustrated by "the seemingly never-ending gridlock and grandstanding in Congress...but I happen to believe in the system."

"The green industry is perfectly poised to be the environment's white knight in shining armor in the '90s. Despite the troubles, I'm optimistic about the future of our industry."

—Jerry Roche

ERA

TURF-TYPE TALL FESCUE

Setting New Standards For Turf Excellence

ERA is a new generation of high performance turf-type tall fescues with dwarf variety characteristics.

Unlike older tall fescue varieties, ERA has fine leaves comparable to those of some Kentucky bluegrasses. ERA forms a dense, dark green turf of exceptional quality and can sustain its appearance even when mowed as short as 1½ inches.

Slow vertical growth means that ERA requires less frequent mowings than other varieties, especially during the spring.

ERA has good wear resistance and will tolerate moderately wet soil as well as periods of drought. Under stress conditions, ERA can still be expected to maintain its fine texture and rich green color.

When maximum performance and low maintenance are your objectives, remember ERA - the new generation turf-type tall fescue.

NO OTHER GRUB CONTROL PROGRAM HAS EVER
SOUNDED THIS GOOD.

Control grubs before they damage your turf while minimizing the impact on the environment.

If you think that sounds good, then call for our free audio tape and brochure.

Each tells you about this pre-damage strategy and how to implement it. From scouting for signs of grubs to timing your applications.

Also, they show you how well DYLOX Insecticide fits in a pre-damage program. DYLOX works fast to control all species of white grubs. Plus, DYLOX goes away quickly, reducing the long-term risk to the environment.

For your free tape and brochure, call 1-800-842-8020. Or write Miles Inc., Specialty Products, Box 4913, Kansas City, MO 64120.

The call is free. The tape and brochure are free. All we ask is that you lend us an ear.
