

PRODUCT REVIEW

New package comes in response to this country's environmental concerns

To better address the environmental concerns of its customers, American Cyanamid Company's Specialty Products Department has designed a new, water-soluble bag for Pendulum WDG herbicide.

The water-soluble package has been designed to eliminate container disposal problems, provide pre-measured quantities in an easy-to-use packet, and eliminate product exposure during mixing and loading.

The packets are made of inert ingredients that completely dissolve within minutes after being added to the tank.

"We've worked closely with our customers to develop an effective, economical, easy to apply product," says Curtis Clark, product manager for American Cyanamid.

Pendulum WDG is a pendimethalin-based product, highly effective for controlling most annual grasses and certain broadleaf weeds as they germinate, before they become a problem.

Pendulum should be applied only to established plants, and is not to be used on seedbeds, transplant beds or liners until plants have become well-rooted.

Growth regulator OK for Calif. ornamentals

Sumagic, a plant growth regulator from Valent U.S.A. Corporation, has received a state registration in California for use on container-grown ornamentals.

The product acts as a growth retardant for commercial greenhouse, lathhouse and shadehouse use.

Sumagic's broad label enables it to be used on a variety of plants, from chrysan-

themums to poinsettias. It works by controlling the growth hormone that stimulates stem elongation, thereby resulting in more attractive, compact plants that are easier to ship.

Valent says Sumagic lengthens plant shelf life and causes foliage to darken, even with fewer applications.

New sunscreen dispenser is now available

SBS Products, Inc. has introduced two new packages and dispensing systems for Deflect Occupational Sunscreen: 1-oz. tubes and a 50 fl.oz. dispenser cartridge.

The new packaging will make the product more convenient and easier to use. The small tubes can be carried on the job. The Paxon 1500 cartridges can be attached to a locker room or restroom wall.

Deflect is an SPF-15 formulation (15 times the skin's natural protection from ultraviolet rays).

The product is waterproof, and, according to SBS, will not run off, even with heavy perspiration, yet will still allow the skin to breathe.

The formula is greaseless, dries completely, and will not cause problems gripping tools or equipment.

Deflect contains aloe vera gel and vitamins A, D and E to help alleviate the drying effects of the sun. Recommended for landscape/golf course workers.

Activator enhances efficacy by modifying pH, water

Terra International, Inc. has added Riverside AMS Plus to its line of control products.

AMS Plus enhances herbicide, defoliant and desiccant performance by modifying factors such as pH and hard water.

It is a liquid ammonium sulfate activator containing phosphate ester of polyglycoethers, a blend of ammonium salts and formulation aids.

AMS Plus is recommended for use with Diquat, Endothal, Gramoxone, MSMA, Poast, Roundup, Roundup RT, Jury and other products where an ammonium sulfate activator is required.

Herbicide efficacy is improved, says Terra, because AMS Plus improves herbicide uptake.

Users are instructed to add AMS Plus first when preparing a spray mix. It is recommended for use in ground and aerial application, and comes in a 32.5-gallon jug or mini bulk.

Blankets protect against cold, promote germination

Tyvar Turf Blankets are an effective, durable and inexpensive way to protect turfgrass from freezing and desiccation.

The blankets are made of spunbonded polypropylene, and come in two weights:

- the white, 1.9 oz./sq. yd., for temporary freeze protection for turf in cold- and warm-season areas;

- the black, 3 oz./sq. yd. blanket, to protect warm weather grasses with temporary winter greens in the transition zone.

The Tyvar blankets retain warmth and moisture, creating an environment similar to that in a greenhouse. According to the company, university testing has shown that both soil and surface temperatures will be 3-15 degrees Fahrenheit higher than uncovered turf.

The blankets can also be used for turfgrass growth and germination. Golf course superintendents use them after seeding, sprigging or sodding, which results in early green-up.

IF YOU'VE FORGOTTEN HOW WELL WE CONTROL MOLE
CRICKETS AND NEMATODES, CONSIDER THIS
A REFRESHER COURSE.

We wrote the book on mole cricket and nematode protection. Now we'd like to send it to you.

In it, we'll show you why there's nothing better for controlling mole crickets than OBTANOL® insecticide. It gives you excellent residual control. It costs about 30% less per 1,000 square feet than the closest competitor. And it stops mole crickets. Plus, it controls fire ants, too.

Also, we'll show you why there's only one choice for controlling nematodes. NEMACUR® nematicide. It has a 20-year history of controlling more kinds of nematodes than any other product.

For your free booklet, call 1-800-842-8020. Or write Miles Inc., Specialty Products, Box 4913, Kansas City, MO 64120.

Examine the information. Then apply it. And you'll have a course everyone will study.

PRODUCT REVIEW

Another growth regulator gets Golden State go-ahead

The California Department of Food and Agriculture has approved the registration of Bonzi plant growth regulator from Uniroyal Chemical Company, Inc., for use on ornamental plants.

Bonzi is an important tool in the production of compact plants for the ornamentals market. It is used to reduce internode elongation in plants grown in greenhouses, shadehouses, nurseries and interior landscape designs. The approved use list includes poinsettias, geraniums, chrysanthemums and a wide variety of bedding plants, including impatiens, vinca and pansies.

Bonzi can be applied as a bench spray. It penetrates into plant stems and is translocated to the terminal, where it reduces internode elongation. It can be applied at any time.

When used as a drench application, Bonzi provides optimum control of plant height, says Uniroyal. It is readily absorbed by plant roots and translocated to the terminals.

Drench applications generally provide longer and more-uniform height control than foliar applications.

Cabinet safely stores, organizes turf products

Justrite Manufacturing Co. now sells the "Cabinet Organizer," with optional drawer assemblies.

The option applies to the 45-gallon cabinet with manual closing doors.

Two-, three- and four-drawer configurations are available, allowing workers to customize the cabinet to storage needs.

Worker safety and productivity are enhanced by maximizing access to important safety equipment in one centralized location.

The drawer units are ideal for storing easily misplaced containers.

Available as:

2 shelves, 2 drawers;

2 shelves, 3 drawers;

2 shelves, 4 drawers;

2, 3 and 4 drawers only.

Circle No. 215 on Reader Inquiry Card

Engines feature clean PTO muffler, splash-type lube

Kawasaki's FE120D and FE170D horizontal shaft engines now have redesigned muffler for clean power take-off.

The FE engine series has an overhead valve design and superior performance to meet the most demanding uses.

Both are single cylinder, air-cooled, four-stroke engines, fitted with recoil start and automatic compression release. They employ a dual element air cleaner and splash-type lubrication with low-oil shut-off.

The engines serve many applications in light construction equipment.

Deep root feeder blends nutrients for trees, shrubs

Webster Corporation makes a deep root tree and shrub feeding system that drills and fills in one operation.

The system makes deep root feeding with dry fertilizer and nutrients around homes and at commercial establishments safe and economical.

The TC-300 Deep Root Tree Fertilizing Machine drills and fills perfectly-shaped holes at uniform depth between the stem and drip line.

Operators can easily handle up to four holes per minute for typical tree feeding operations.

The Webster system places custom-blended fertilizer and nutrients in four-oz. rates at a depth of 12 inches below the soil surface.

Circle No. 217 on Reader Inquiry Card

Zero-turn walk-behind has dual pump/motor drive

The Scap SWZ Zero-Turn walk-behind mower reduces cutting time by 20-40 percent, according to Scag.

The mower is built with a patented dual pump/motor drive system for independent power to each wheel, for no-scutt, zero-radius turning.

Just a squeeze of the handles moves the SWZ from forward to neutral to reverse.

Forward speeds are controlled with a single, patented lever, and can be changed

while moving.

A new electric blade brake clutch engages the blades.

Cutting decks range from 32 to 72 inches, and engines range from 12.5 to 20 hp.

A mulch kit is also available.

Circle No. 218 on Reader Inquiry Card

Fountain/aerator beautifies ponds, raises oxygen level

The new Toro Fountain/Aerator adds visual interest and rejuvenates by increasing dissolved oxygen levels.

The aeration provides circulation and maintains aerobic conditions throughout the water column.

A pump draws cold, dense oxygen-deficient water from below the water surface.

The water is projected into the air in the form of a decorative spray pattern.

While in the air, water droplets absorb oxygen, which is then dispersed as the water falls back into the pond.

Four decorative spray patterns are created from totally interchangeable nozzles.

Pin placement by color with multi-hued nylon flags

Superintendents looking to add more color to greens can try the new hole marker system from Standard Golf.

The Royaline Cup-Spitter System provides a complete nine-hole pin system in red, white and blue.

The company says the Royaline Flag Sticks are the most popular pins in the Standard Golf catalog.

Striped in the three colors, they're built with the strength and resiliency of straight, solid fiberglass.

At the bottom of each pole is a precision-cast aluminum ferrule which fits snugly in the cup.

The red, white and blue nylon flags are very visible.

The pins are available in both grommet and tube-lock configurations.

Each marking system includes nine flag sticks, three red flags, three white flags and three blue flags.
