TAKE CONTROL WITH PENDIMETHALIN.

If crabgrass is a growing problem on your turf, you're not using the right herbicide. What you need is Pendimethalin.

No other preemergent offers a broader spectrum of control. Fact is, this high-performance herbicide effectively controls crabgrass, most annual grassy

weeds, and many annual broadleaf weeds, stop growing—and start dying—before emerging.

What's more, Pendimethalin works hard—and long.

Through the entire season. That's because its low volatility and slow decomposition characteristics keep it active in the soil longer.

Pendimethalin also makes your life easier. You have the flexibility to spread it on as a dry granule,

alone, or in

combination

with fertilizer

products. Or

you can use

the sprayable formulations, available as a 3.3 EC,

60 WDG and 60 WP.

No wonder professional turf managers have made Pendimethalin the #1 preemergent herbicide.

So take control of your turf—and your reputation. Use Pendimethalin herbicide to control crabgrass and more. Because the only thing you should see growing like a weed is beautiful grass.

Call now for more information or for the distributor nearest you.

And Pendimethalin has excellent turf tolerance.

University and field research studies have shown that Pendimethalin provides consistent, superior weed control—yet offers tremendous tolerance to warm- and cool-season turfgrasses.

Here's how it works: After Pendimethalin makes contact with the germinating weed seed, it disrupts the seed's biochemical processes,

which makes the weed seed

POSTMASTER: Send address changes to Landscape Management, P.O. Box 6198, Duluth, MN 55806.

Looking over our article index for 1997, we're glad to have brought you a variety of articles and news this year. But onward we go, as many things we reported on for you in 1997 will continue to pick up steam in 1998.

The biological market is "bubbling," as we wrote in June. These products are getting the attention of our leading turfgrass researchers, and have achieved official "seminar subject status" at turfgrass conferences.

Those who have reported favorably on biological products include Dr. Hank Wilkinson of the Univ. of Illinois, Dr. Fred Baxendale of Nebraska, and Dr. Eric Nelson of Cornell. Nelson, while not endorsing any particular bio product, spoke of their promise at the New York State Turfgrass Association show in Syracuse last month. Some superiors like them for positive pr, says Nelson. The "environmentally friendly" angle, a valid concern, is more acceptable to some. The questions is, are they also easy to fit into existing control strategy?

"Others see biological controls as perhaps the most effective and sustainable approach to disease management," says Nelson. The use of corn gluten meal products as herbicides is on the rise, reports Nelson. Discovered by Dr. Nick Christians of the University of Nebraska, and reported on by LM a couple years back, five million pounds have been sold in 1997, for goosegrass and crabgrass control. Not a huge amount, but it's good to see an "alternative" product that works. There are also some notable new control products from the big boys, such as Rohmid's MACH 2, Bayer's Merit, and Conserve, from DowAgrosciences (the soon to be new name for DowElanco).

We feel we were assertive in our athletic field

editorial this year. Groups such as the STMA and its regional chapters; people such as Floyd Perry; Dr. Kent Kurtz; David Mellor; and Dr. David Minner have all contributed mightily this year. Managing editor Ron Hall and myself have spoken with many other athletic turf managers who feel the most important issue of the day is finding ways to fund turfgrass management and renovation. Watch for more on this from LM in 1998.

We're proud to have been the first Green Industry magazine to highlight the growing need for equipment maintenance training, and the lack of good mechanics in times of full employment.

We also broke the story on the Green Industry labor crisis, which earned us an award from Turf & Ornamental Communicators Association (TOCA). In fact, we took six TOCAs!

Other employee issues we covered in 1997: recruitment; training; retention; incentive pay and motivation.

In October, we brought you our *35th Anniversary Issue*, a special look back at how far the industry has come since 1962.

Looking ahead, the EPA is on a roll as it cranks up its Food Quality Protection mandates and examines endocrine disorders and children's exposure to pesticides and dirty air.

But let's not get too excited about 2000. It's just another year when it comes to getting the customers, getting the employees, getting the funding, and getting the job done. There are no breaks from '99-00, and the season then will be just as long as in any other year.

As editors, we know what you want to see from this magazine, and we strive to get you the best information you can use on any given day.

This *Green Book* is an example. It's your year-long reference to the people and places that make the Green Industry tick. Just about anyone you need to call is listed here, from turfgrass researchers to equipment manufacturers. When you have a question that needs answering, think '*Green Book*,' and your answer is not far off.

Best wishes for a great '98!

Green Industry ideas, issues are 'to be continued'

TERRY McIVER
Editor-in-Chief

There's more than fertilizer in this bag.

There's a total resource. One that can help you grow healthy, green turf with a strong root system and a solid base. Turf that's healthy and better able to fight disease, pests and everyday wear and tear. That resource is Terra. You'll find a complete, new line of Terra Professional Fertilizers – with primary, secondary, micronutrient and pesticide packages available. Plus, you can count on the support, service, assistance and expertise it takes to select and use the right

fertilizer. The product that will do the job for you. For fertilizers, turf seed, plant protection products and a whole lot more – work with Terra. You'll get more.

Working with you.

Circle No. 131 on Reader Inquiry Card

Every lawn and landscape has thousands of tiny time bombs hiding in the soil. Broadleaf weed seeds. And the best time to stop the explosion

is before they emerge. A preemergent herbicide application creates a zone of protection where weeds get whacked as fast as they germinate.

So your customers never see any weeds, and the turfgrass gets off to a fast, healthy start. It works so well, it can eliminate a lot of callbacks and

"PEN WRITER"

If you could make more money, increase your customer service & eliminate posting...

Would You?

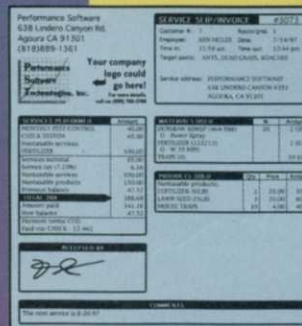

"Pen Writer" electronically synchronizes The Newton-MP 2000 hand held, with 16.1mhz speed & 5mb Ram, and "Route Rite" software, version 3.2+. Providing an efficient paperless environment for your office, a hardcopy for your customer without the technician needing to come back to the office. No Posting because its all electronic.

"Pen Diagramer Plus" allows the integrated drawing of diagrams with labels, notes, findings & recommendations. This makes our inspections reports a breeze. Fill in the blanks, Draw, Print, fax, integrate it or upload it, from the field.

Bar-code item with "Pen Diagramer Plus" and wand. Scan barcodes with date, time and your notes. Accurate reporting!

Invoices printed right at the customers door with your logo. The customer signs on "Pen Writer" and it is printed on bill. It is also great for bids with inventory of material, product, people, & equipment costs.

"Route Rite" is our fully featured desktop routing and accounting package, since 1991. It is totally integrated and works in the DOS, Win.

3.11, Win 95, single and multi-user environments with Novell, NT, Win Terms, Intranet, DDE, DLL, ODBC & data warehousing. Mix & match your needs.

Purchase or Lease (from \$85.00 monthly - includes "Route Rite" 1000, plus one "Pen Writer" software & MP2000, "Pen Diagramer Plus"). Printers, Barcode Wands & fax modems are optional.

Move to Kubota Country

Move to Kubota country and you'll find versatility, durability and operator comfort. The Kubota B-Series (13 to 18 PTO horsepower) tractors are compact to fit in tight places and powerful to get lots of jobs done. Kubota performance matched implements include rotary tillers, front loaders, mid and rear mount mowers, boxscrapers and snowblower.

Need more power? Move up to the innovative Grand L-Series (25 to 37 PTO horsepower). Hydrostatic steering, shuttle transmission with shift-on-the-go provides ease of operation. Kubota's exclusive optional Glideshift transmission has clutchless operation through all eight speeds, forward and

reverse. These tractors are smooth and quiet, with Kubota's E-TVCS engine which ensures clean emissions while providing high torque rise. Get one with an integral cab with heat and air-

conditioning for year 'round comfort.

Visit your Kubota dealer and find out how to make your move - to Kubota country!
