17 good reasons why a Bobcat long-wheelbase loader is the wise buy for landscapers.

1. The extended wheelbase on the Bobcat® 763, 773, 863, 873 and 963 skid-steer loaders not only makes for a significantly smoother ride, it also lets you lift heavier loads than a compact wheelbase machine. The operator works in smooth-riding comfort all day long.

2. Bobcat loaders are built to be dependable. Landscaper Roy Poirier of Barrie, Ontario, works each of his six Bobcat loaders up to 2,000 hours a year excavating, backfilling, grading, and loading and unloading topsoil and sod. "I can't say enough good about them," he explains.

3. Designed with muscle to spare, a Bobcat loader will dig all day — and can easily lift and carry sod, bricks, blocks and other heavy loads.

4. A hefty diesel engine with plenty of power makes every Bobcat loader a non-stop work-horse that quickly handles big jobs even in small spaces.

5. With brisk travel speeds, Bobcat loaders cover more ground in less time. "The loaders allow us to work faster and take on more and bigger jobs," says Eric Proffitt, co-owner of a landscaping firm in The Dalles, Oregon.

6. Besides being brawny and fast, Bobcat loaders have added reach and lift height to clear high-sided truck boxes and hoppers. Loading and unloading is a breeze.

7. Bobcat loaders come in sizes to match every job. The 773, for example, is our mid-size lift-and-carry champ. The somewhat larger 863 takes on heavy-duty work with added power and speed, and the extra muscle of the big 873 makes every landscaping job easier, faster and smoother.

8. The hydraulic pumps on Bobcat loaders are designed to generate plenty of hydraulic power to operate attachments like Bobcat® Augers, Landscape Rakes, Power Rakes, Trenchers, Tillers, Breakers and more. High-flow options are also available for some models.

9. Speaking of attachments, we design and build more than any other skid-steer loader manufacturer.

Depending on model, you can select from some three dozen attachments, each with full warranty and Melroe's unequaled parts and service support.

10. Our reliable Bob-Tach™ system makes attachment changes fast, secure and hassle-free. A Bobcat loader operator can easily replace a bucket with Bobcat® Pallet Forks, Landscape Rake, Stump Grinder, Combination Bucket, Backhoe, Auger, Grapple and others — all as quick as a snap.

11. Bobcat loaders have drive chains that *never* need adjustment. We use endless loop, hardened steel drive chains configured in a "bow tie" pattern for longer life even in the most rugged conditions — with no periodic, time-consuming adjustments.

12. You can forget about axle grease. Bobcat axle bearings are self-lubricating — never need greasing. And our hub design offers great seal protection. Most other loaders require lots of grease — both axle and elbow.

13. Serviceability is unsurpassed. Simply open the swing-out tailgate for full access to the engine's checks and fills, filters and battery. And unlike other brands, the lift arms need not be raised to service the machine. Shop time is spent repairing, not gaining access.

14. The Bobcat belt drive design allows the engine to run slower, resulting in quieter operation, longer engine life and lower fuel consumption — another feature found only on Bobcat loaders.

THE bobcat ADVANTAGE

15. Operator training course kits and safety videos, available from your Bobcat dealer, let you train new operators and bring current operators up-to-date with the latest safety and operation functions on Bobcat products. (Some also available in Spanish.)

16. Bobcat loaders maintain high resale value year after year because of the Melroe Company's long tradition of quality-built products and after-sale support.

17. When you buy Bobcat equipment, you get the advantage of a worldwide network of Bobcat dealers offering industry-leading parts and service support. In fact, there are more full-time, dedicated Bobcat dealers and factory-trained support staff working exclusively to serve your compact equipment needs than any competing manufacturer in the world.

PREVENT GRUBS. STOP THEM IN THEIR TRACKS. OR MAKE SURE IT'S NOT EVEN AN ISSUE.

Now you can control grubs preventatively or curatively. With a single application. Only with new MACH 2™ Turf Insecticide.

MACH 2 is a powerful killer with a new chemistry that accelerates the molting process of target insects.

Just hours after ingesting MACH 2™, the insect stops feeding. Then it dies beneath the surface in 2 to 3 weeks. It's that simple.

With MACH 2™ Turf Insecticide, you'll kill target

enemy insects all season long. Grubs. Cutworms. Armyworms. Sod webworms. Plus, odorless MACH 2™ is easy to apply. You don't even have to water it in immediately.

So don't let grubs control your grounds, or your schedule. Depend on MACH 2™ Turf Insecticide. It's all you need to prevent or cure.

For more information or for the distributor nearest you, call 1-888-764-6432.

MACH 2™
TURF INSECTICIDE

**ALL YOU NEED
TO PREVENT OR CURE.**

GMAC[®]

COMMERCIAL SERVICES

It's easy to arrange financing and leasing right at your GMC dealership.

© 1998 GM Corp. All rights reserved. GM, GMC, the GMC logo, and Dex-Cool are registered trademarks and Vortec is a trademark of General Motors Corporation. Buckle Up, America!

OUR 150,000-MILE COOLANT CAN GO A LONG WAY TOWARD HELPING YOU MANAGE YOUR BUSINESS.

To keep your business up and running, your trucks have to stay up and running — it's that simple. That's why we've developed a silicate-free coolant used in our trucks that's engineered to last five years or 150,000 miles before its first scheduled change.* The advantage is clear: instead of going into the shop, your trucks stay out on the road.

Less Time In The Shop, More Time Working.

Our Dex-Cool® coolant is just one little detail out of many which can add up to big savings in time and money for your business. The coolant, for example, works in conjunction with a whole array of other long-life components, like platinum-tipped spark plugs and a one-piece serpentine drive belt in the powerful Vortec gas engines of our trucks. So your

first scheduled tune-up is 100,000 miles down the road.*

Managing Your Trucks Is Like Managing Your Business: Every Detail Counts.

In every little detail, GMC trucks are engineered for strength, for durability and for longer intervals between scheduled maintenance.* Less maintenance means less downtime — so you can spend your time running your business instead of taking care of your trucks. For more information about GMC commercial trucks, see your GMC dealer, call 1-800-GMC-8782 or visit www.gmc.com/at_work on the web. With GMC, you can keep your trucks running as smoothly as your business.

* Maintenance needs vary with different uses and driving conditions. See owner's manual for details.

SUPRANOVA SUPINA BLUEGRASS

**The Dunthorpe Garden Tour.
Five exquisite estate gardens.
Rows of award-winning roses.
Rainbows of peonies and azaleas.
Elegant fountains and waterfalls.
But what really stole the show,
was the grass.**

It's not everyday a lawn gets more attention than endless acres of magnificent flowers. Unless, of course, it was seeded with Supranova Supina Bluegrass from Fine Lawn Research. Or one of 14 other Fine Lawn varieties, each specifically developed to thrive in a particular environment. Whether your lawn basks in the humid heat of the Southeast, or drowns in the moisture-rich Northwest, the experienced

agronomists at Fine Lawn can help you select a seed mixture that will exceed your expectations. We can even blend different varieties to solve specific needs. The benefits of using Fine Lawn seed are easy to see in residential lawns, athletic fields, parks, golf courses and commercial properties. For more information, or to find the location of the dealer nearest you, please give us a call.
