Somewhere Around The World*

someone buys

A Walker Mower

every

20 minutes

* during normal working hours

AFTER 19 YEARS on the market, customers are buying the Walker because it is a proven good investment. We invite you to join the growing Walker Mower family.

WALKER Dealer, Everette Schultz, H & B Equipment and Rental, Saginaw, Michigan, delivers the 7th Walker to Jonny and Cindy Heinz, Jonny Heinz Landscaping, spring 1999.

Why Buy a Walker?

- **IT PAYS BACK**—The Walker is producing profit and giving a good return on investment for commercial operators.
- **EASY ON THE OPERATOR**—Best use of labor means working “smart” with productive, easy-to-operate equipment.
- **BEAUTIFUL RESULTS**—Walker delivers the mowed “look” for discriminating customers.
- **SOLD WITH SERVICE**—Walker is sold with a commitment to provide expeditious, efficient service by a network of servicing dealers.
- **VERSATILE PRODUCT LINE**—Six tractor models available, 11-25 HP, gasoline or diesel; nine interchangeable mower decks with cutting widths 36"–62", grass collection, side-discharge or mulching configurations; multiple use attachments also available.

THE ULTIMATE WHEELBARROW

Spreading mulch and compost by hand is a costly, labor intensive process. It limits production and puts workers at risk for injuries. The Express Blower will turn an inefficient process into a profit center and blow your competition away!

The Express Blower can be operated by one person, with remote control, in any weather, on any terrain. Spread mulch, compost, soil mixes, playground chips or any number of other organic materials for landscaping, lawn restoration, erosion control and much more.

With our ALL NEW Injection System, the Express Blower can inject seed, fertilizer or other additives WHILE BLOWING! Install a lawn with soil mix and seed, or blend weed inhibitors with mulch. You can even topdress and overseed turf with only one application.

Get a jump on your competition. Call today and find out how you can expand your possibilities with an Express Blower!

Visit our web site at www.expressblower.com
A division of Rexius Forest By-Products, Inc., Eugene, Oregon

5 MEN AND A WHEELBARROW

A typical 5-person crew can spread 8 cubic yards per hour.

1 MAN WITH THE EXPRESS BLOWER

One person, can blow 30 to 100 cubic yards per hour.

Turfco Sells Lawn Equipment Factory Direct

Turfco Manufacturing Inc., based in Minneapolis, has announced a new direct purchase program for its lawn care products line. The new program will be available to landscapers and lawn care firms involved in commercial turf maintenance.

The new "Turfco Direct" program began November 15, 1999, with important new features for buyers, such as:

- 90-day "same as cash" purchase option
- No payment for 120 days
- 14-day "satisfaction assured" approval period
- Extended two-year new equipment warranty period
- A new "Parts Direct" overnight delivery program
- Toll-free phone ordering at 800-679-8201
- Online ordering and purchase options at www.turfco.com

"Customers receive products faster for less," says President Kinkead.

Direct delivery now saves you time and money.

"This new program was developed after very deliberate and careful market analysis," said George Kinkead, Turfco President. "The fast pace of product development and improvements makes it imperative that new products be made available to end users as rapidly as possible. For example, Turfco has introduced 12 new products to the market just in the past seven years. Yet, the "main-line" dealer operations focus most of their efforts on their primary product lines, so renovation and specialty products tend to get lost in the shuffle."

Kinkead says offering both products and replacement parts directly to customers will shorten their turn-around time for getting new equipment into operation, as well as getting machines back to work quicker. "Our product designs now make it possible for equipment owners and operators to make most repairs and adjustments right in the field, using regular hand tools."

Kinkead continued "Our turn-around time will be shorter and our factory will be more responsive. The company's golf course products will continue to be marketed through our existing distribution channels."

The new "Turfco Direct" phone number is (800) 679-8201. Fax requests and orders can be sent to (612) 785-0556, mailed to Turfco Manufacturing, Inc., 1655 101st Ave. N.E., Minneapolis, MN 55449-4420 or e-mailed to sales@turfco.com. For fast, immediate savings, visit the company's website at www.turfco.com.

The new "Turfco Direct" program will include Turfco's lawn aerators, sod cutters, edgers and lawn overseeder.

IS THERE A POND GUY IN YOU?

**I love turtles, fish, and frogs!
So much so that when my hobby
outgrew my parents house I dug up
the backyard to build a water garden.**

**The ultimate fish tank I thought would be
a thousand-gallon pond where my critters
could live just like they would in nature.
That simple concrete pond built in 1982
became my passion and sparked what
would ultimately be a lifelong odyssey.**

In 1991, my hobby became my profession with the launch of Aquascape Designs a residential and commercial water feature design/build firm.

Aquascape Designs still builds ponds, waterfalls, and streams so others too can enjoy the beauty of nature where they live and work. In fact building water features is the backbone of our business and acts as a continuous R & D department. Our focus however has expanded from just building water features though. Today we have a company wide mission of "Changing the Way the World Builds Ponds." Far too many contractors experience frustrations constructing water features. Green water, leaks, over complicated filters and confusing pumps and plumbing have plagued water feature design and construction for years.

It doesn't have to be that way! Water features can and should be the most profitable part of any landscape installation. In order to be successful with water features though we've found you need to keep it simple, work with nature instead of against her and follow a step-by-step plan. By following this approach we've been able to grow Aquascape Designs into the country's largest water garden builder.

Now it's your turn. If you're interested, curious, or even skeptical on how water features can improve your bottom line sign up for our free information. With the video and or magazine you'll learn about what other contractors across the country are doing to have success with water features and their business in general. You'll see the tricks of the trade and get ideas on how to incorporate water features into your business. Best of all its all FREE! I never would have dreamed a hobby would become my profession. Maybe water features could become a profitable part of your business too!

**Call us, fax us, or write to us
to see how you too can prosper with
water features; the fastest growing
trend in the green industry today!**

Greg Wittstock
Founder & President of Aquascape Designs, Inc.
