

**PREVENT
GRUBS.
STOP THEM IN
THEIR TRACKS.
OR MAKE SURE
IT'S NOT EVEN
AN ISSUE.**

Now you can control grubs preventatively or curatively. With a single application. Only with new MACH 2™ Turf Insecticide.

MACH 2 is a powerful killer with a new chemistry that accelerates the molting process of target insects.

Just hours after ingesting MACH 2, the insect stops feeding. Then it dies beneath the surface in 2 to 3 weeks. It's that simple.

With MACH 2™ Turf Insecticide, you'll kill target enemy insects all season long. Grubs. Cutworms. Armyworms. Sod webworms. Plus, odorless MACH 2™ is easy to apply.

You don't even have to water it in immediately.

So don't let grubs control your grounds, or your schedule. Depend on MACH 2™ Turf Insecticide. It's all you need to prevent or cure.

For more information or for the distributor nearest you, call 1-888-764-6432 and visit our website at www.mach-2.com.

MACH 2™
TURF INSECTICIDE
ALL YOU NEED TO PREVENT OR CURE.

The Landscape Management Handbook

The best single-source reference containing the most current and comprehensive information on the basics of turfgrass and landscape management available today!

edited by
William E. Knoop
125 pages, softcover
Item #LSMB830

\$24⁹⁵

Provides an overall understanding of turf and landscape care and management and covers all the basics of the green industry

Covers all the topics golf course superintendents and students of turfgrass and landscape management need to know

Combines practical information with the tried and true basics of management to provide a single, practical, affordable and up-to-date text

Features detailed information, charts, diagrams, figures and tables to illustrate key information points

The Landscape Management Handbook provides a unique, single-source reference of comprehensive information on a variety of turf and landscape topics. It's an ideal handbook for golf course and lawn care superintendents and crew members, and is also appropriate for schools that teach basic turf and landscape management.

Don't Settle For Cheap Imitations

Sometimes imitation is the fondest form of flattery. But when it comes to parts for your John Deere commercial equipment, flattery will get you nowhere. That's why John Deere has packaged its original equipment replacement parts for your specific machine into one convenient box. John Deere Recommended Parts Match (RPM) Kits* have everything you need for 500 hours of scheduled maintenance. Oils, filters, fluids, belts, blades and plugs. Get the real deal. Pick up an RPM Kit today.

*Not available in Canada.

PACK

Everyone thinks Alan Greenspan's job is so hard, but I don't think so. As chairman of the Federal Reserve, he is one of the most powerful people on the planet. Every time his limo glides up to Capitol Hill, the world's financial communities wait with bated breath and listen for his predictions. All he has to do is *mention* adding more money to the nation's money supply or say he's just *considering* a teeny jump in the Fed's interest rates to banks, and world's financial markets react (or overreact) instantly.

I had the pleasure of touring the Federal Reserve's Washington D.C. headquarters last year with my business school class. We sat through a dull lecture on the Fed's operation, then got to the meat of the tour — the Federal Reserve Board's meeting room. This place was cool. It *reeked* of money.

The large, elegant room has an impressive wooden oval table for about 20 people in the center, plus a gallery for spectators and the press. The walls are decorated with framed collections of United States paper money in editions dating back to the early 1900s, showing denominations as rare as \$10,000 bills.

The tour guides' favorite part is when they flip the switch at the door. This activates pop-up monitors in the table, projection screens and cameras from the ceiling and 20-foot-tall window screens that drop to shut out the light. I liked that show, but the part I loved best was the opportunity to sit in Mr. Greenspan's chair. In the economic world, this is like sitting on the emperor's throne. Each of us took a turn sitting in that chair and each hoped to get some monetary wisdom or even dumb luck from the experience.

The chair I sit in now is a lot different, yet my job is somewhat similar to Mr. Greenspan's. I'm

not sure if any of his vision filtered through to me, but we're doing our part to analyze the industry in this month's cover story — the State of the Industry report. Unlike Alan Greenspan, however, we don't have legions of economists to analyze our industry, forecast its ups or downs and make educated recommendations. When he goes to Capitol Hill, he relies on the work and brains of thousands of experts.

Our job at *Landscape Management* is different, because as our industry's largest firms and our competitors have found out, there are very little "hard data" available. This industry is so young that few government offices keep detailed information about it. Some numbers on the industry's size, revenue potential and buying power become established for lack of any others, then are endlessly repeated as "fact."

That isn't good enough for me. I'm no Alan Greenspan but I do see my role as offering you bona fide information, statistically valid data and educated projections that you can rely on. We've started this process at *LM* with our latest report and will be adding more of our own original research in the near future.

Take a look at this year's overview, which starts on page 23. It's based on our own research, as well as other recent industry figures we trust. We've even added a few projections of our own (which, of course, rely partly on Mr. Greenspan's moves).

Now that I think of it, maybe his job is really difficult. If he makes the wrong recommendation, millions will lose money and he is held responsible. That's one tough position! In our industry, success is defined more by how well you do, not how well we project. And so far, you're doing just fine. **LM**

Daffodils and Crocus for Fall Planting

FLOWERBULB LIFE CYCLE

April: Tulips bloom in The Netherlands.

June/July: Flowerbulbs are dug from the ground, graded and stored at proper temperature.

August: Flowerbulbs are packed for export to the US.

September: Flowerbulbs arrive in the US.

October/November/December: Flowerbulbs are

delivered and planted* in US gardens before the onset of Winter.

March/April/May: Crocus, daffodils and tulips bloom in gardens in the US.

*The flowerbulbs will be delivered in the Fall when soil temperatures in your area drop below 60°F. This is the proper time for planting. Tulip, daffodil, crocus flowerbulbs, etc., have to be planted in the Fall to establish a root system before the onset of Winter.
