THE EVERGREEN FOUNDATION

Bringing Professionals and Volunteers Together to Create Green Spaces that Improve our Lives

It's a proven fact:

Green spaces such as public greenways and trails:

- . Act as filters to cleanse the air of pollutants
- · Act as sound buffers
- Have a calming effect on mind and body
- · Are places for recreation as well as enjoyment
- Provide habitat for wildlife that would otherwise be driven away

The Evergreen Foundation is unique among existing organizations working to create new greenways. We harness the skills and resources of professionals in the Green Industry, including manufacturers, and couple them with dedicated volunteers from local communities.

Green spaces within a community improve the quality of everyone's life

WE INVITE YOU TO JOIN US

Become a member of the Evergreen Foundation in one of three ways

- · Green Backer
- Green Supporter
- Green Promoter

For more information about joining the Evergreen Foundation please contact:

> Den Gardner, Development Director 120 W. Main St., P.O. Box 156 New Prague, MN 56071 1.877.758.4835

BY BALAKRISHNA RAO, PH.D.

Lil' sprouts

What is the best way to selectively get rid of sprouts growing at the base of crabapple trees?

- MI

Sprouts growing at the base of trees present a serious aesthetic problem in many landscape ornamental plants. Crabapples in particular often have this problem.

One of the best ways to manage them is to prune them. This method is time-consuming and labor intensive, but there aren't many other practical solutions to the problem if you want to get rid of them quickly.

Another option is to use an herbicide such as Krenite, which kills buds at the base of foliage. Apply it on unwanted sprout growth late in the growing season when all the leaves are produced. For better results, apply between the time the plants' leaves mature and the time the leaves drop.

Make sure you have the proper pesticide license to use this product. Read and follow label specifications for best results.

Gypsy moths, again

The Gypsy moth problem is increasing every year in our area. We should have used Bt when the caterpillars were young and small. Now, they're large, and we're wondering what kind of insecticide would give us good results?

— он

The Gypsy moth problem is slowly spreading from the eastern part of the U.S. westward. Recently, northeast Ohio has been experiencing the problem.

Bt and Conserve insecticides do an ex

cellent job of managing small and young caterpillars during the first and second instar stage. However, as the caterpillars get older and larger, reports indicate that other products such as Sevin or Talstar work best.

Gypsy moth larvae (caterpillars) produce silken threads from trees and hang down or balloon. They spread from place to place by wind or storms. Through the ballooning method, they can enter a property after it has been treated with insecticides and cause feeding damage. Therefore, monitor the treated properties for reinfestation and retreat as needed. Read and follow label specifications for best results.

Mysterious leaf twisting

On a client's property, as well as nearby properties, a number of deciduous trees' leaves are cupping. We suspected herbicide injury, but there is no evidence of any herbicides applied to the lawn. However, there is a farm nearby. We think a herbicide or some other material applied there might have spread and caused the problem. Is this possible?

The problem is most likely caused by a volatile product coming from the nearby field. These volatile compounds could be related to some herbicides or ammonia-type fertilizers.

Volatile compounds in herbicides can migrate from a source like a farm to nearby locations, causing leaf twisting and curling distortion. This is often acute following an application and normally doesn't persist for too long. Therefore, only the exposed new growth shows leaf distortion. Subsequent new growth may not show any adverse growth distortion. However, if future growth also shows problems, study the farm site and their operational practices. Affected plant portions can be pruned or left as is. Since deciduous trees lose leaves in the fall, the new growth won't display the problem unless similar contamination occurs next year.

Right time to treat?

Since Merit insecticide is a systemic product, we would like to use it to manage many general pests in the land-scape. Our question is, should we treat suspect trees in the fall or in the spring?

- WI

Since it isn't clear what target insect pests you're trying to manage, I will base my answer on the label recommendations for specific pests. In my opinion, most Merit insecticide soil treatments are provided in the fall. This treatment is good for managing those pests that become active before June. Spring treatments should help manage pests that would become active after June.

Remember to irrigate the soil to move the product to the root zone. Irrigation will improve root absorption and translocation of Merit to the leaves. Otherwise, results may vary.

Before implementing this approach on a large scale, try it in a small area to learn more about its feasibility.

Read and follow label specifications for better results.

Snip snip

STIHL's Precision Series line of hand tools includes three pole pruners, three loppers, one hedge shear, four pruning saws, four pruners and three axes. The pole pruners feature adjustable pole length, bark cutter and hook, and revolving arm. The loppers come in three sizes

with a 1- or 2-in, cutting capacity, and the pruning saws come in four sizes with blades ranging from 6 to 13 in. Axes come in 14- and 24-in, handle lengths.

For more information contact STIHL at 800/467-8445 or www.stihlusa.com / circle no. 253

Edge like a pro

Turfco claims its Edge-R-Rite edger's oscillating blade cuts turf without throwing debris, making it safer to use in high traffic areas and easier to clean up after. It's designed for flowerbeds, but additional blades can be added to suit it for sidewalks, curbs, driveways and to cut in drainage. Depth control can be adjusted up to four inches

For more information contact Turfco at 800/679-8201 or www.turfco.com / circle no. 254

Wide trackin'

The new Toro Dingo TX 425 wide track compact utility loader is powered by a 25-hp aircooled Kohler Command Pro Series engine and offers more than 35 quick-change attachments. Other features include a fourpump, independent hydraulic suspension and dedicated auxiliary hydraulic circuit that provides 11.2 gpm of flow at 3,000 psi of hydraulic power. Its dedicated track drive features dual Kevlar reinforced rubber tracks that offers full ground engagement with only 3.4 psi of ground pressure.

Making the cut

Kubota Tractor Corp.'s diesel-powered 2- and 4-WD F60 Series front-mount mowers range from 22hp to 30 hp. They have a single-pedal operated hydrostatic transmission and auto-assist 4WD with dual-acting overrunning clutch system. They are available with 60- or 72-in. side discharge mowers, or come with a 60- or 72-in. rear discharge mower. Easy access tilt-up

in, ground clearance. For more information contact Kubota at 888/458-2682 www.cat.com / circle no. 256

deck provides 8

Drift containment

Be environmentally correct with the Falcon electric drift containment spray system. It's battery operated, comes with a tank, and no hose is required. Built from aluminum and polyethylene, it uses 10-in. tires for great flotation and easy pushing.

WALKER MID-MOUNT BUYERS GUIDE

WALKER VS MID-MOUNT

A NOSE-TO-NOSE

COMPARISON

Make an honest appraisal BEFORE . . . buying a Mid-Mount "Z"

Walker Manufacturing has introduced a new brochure "What you should know BEFORE buving a Mid-Mount 'Z' Riding Mower." This four-page, full-color brochure (Walker P/N 6895-18) is an honest appraisal of the true value of a compact, maneuverable, out-front Walker versus mid-mounts.

Provided is a 10-point checklist to help the customer match the best of these two styles of mowers to the intended application while understanding their real-life mowing needs. Guidelines such as; working on hills and slopes, precision handling, high-quality mowing, grass collection, trimming capability and five other "real world "mowing applications that a customer should consider before buying any commercial riding mower.
