PERMA-SCAPE

800/635-8379

www.fiskars.com

Made from at least 80% recycled tire rubber and pressed into circular mats, Fiskars Perma-

Scape Tree Rings form a protective decoration for trees and shrubs. Rings look like wooden mulch chips, yet are durable and last up to 10 years. They come in 20-, 24- and 30-in. diameter sizes and are priced at \$15,

\$17 and \$25 respectively. Largest model has six preformed cut-out holes that allow staff to modify and plant flowers to meet landscaping needs. Company is located in Middleton, WI. **Circle #292**

PLANT HEALTH CARE

800/421-9051

www.planthealthcare.com

MycorTree Injectable with Colonize is a VAM mycorrhizal fungi stimulant for soil injection treatment of most tree and shrub species. Plant Health Care, Inc., Pittsburgh, PA, says the product allows fungi to colonize plant roots to help their hosts extract water and nutrients from the soil, improve resistance to certain soil-borne diseases, reduce absorption of soil toxins and extend the root system's life. Company also has other inoculants available for trees, shrubs and flowers.

Circle #293

REDMAX

800/291-8251

www.redmax.com

If you believe weight makes a difference to people working in trees, check out America's lightest commercial chain saw. RedMax, Norcross, GA, puts the unit's weight at 6.4 lbs. It's

powered by a 25.4cc 2-cycle engine and features a dual-activated inertia chain brake and dust-free intake system, Oregon chain and 12-in. bar and climbing ring.

Circle #294

REEMAY

800/321-6271

www.reemay.com

Reemay, Inc.'s Typar TreeCircle is a 35-in. diameter landscape fabric circle that keeps most roots out without inhibiting air, water and nutrients. The company says you won't have to use chemicals or perform hand-weeding for years after installing it.

Circle #295

ROOTS, INC.

800/342-6173

www.rootsinc.com

New Transplant 1-Step from Roots, Inc., New Haven, CT, is available in a 4-oz. foil pack. Packed 65 in a 4-gal. pail, it contains 17 species of mycorrhiza, plus water-holding gels to give each planting the best chance to survive. In addition, the company's mycorrhizaROOTS, available as a biostimulant that works well in deep root feeding of trees and shrubs, now has 17 species of mycorrhiza in it. Each 16-oz. bag provides a broad spectrum application of mycorrhiza for increased nutrient uptake, enhanced root systems and plant stress management.

Circle #296

STIHL

800/467-8445

www.stihlusa.com

A whole series of 19 hand-held cutting tools crafted for the professional is available from Stihl, Virginia Beach, VA. The line includes five pruning saws, three pole pruners, three loppers, one hedge shear, four pruners and three axes. Saws come in sizes from 6 to 13 in. All offer blades that can be sharpened or replaced, strong lightweight handles, comfortable grips and computer-designed cutting teeth or blades. Pole pruners offer adjustable pole length, bark cutter and hook.

Circle #297

TREE STAPLE

877/873-3749

www.treestapleinc.com

Tree Staple of Berkley Heights, NJ, says its below-grade tree and shrub stabilization system is safer, stronger and more cost effective

than stake and wire. It's also more aesthetically pleasing since it's below ground. The company claims that it takes one man with one sledgehammer two minutes to pound the stake into the rootball of the tree to stabilize it.

Circle #298

TREE TOAD

800/479-3099

www.treetoad.com

Transplant a tree in three minutes with the Tree Toad, made in Long Lake, MN. Available in 20-, 24- and 32-in. trailer models and 20-, 24- and 32-in. 3-pt. hitch versions, it's made for smaller trees up to three in. in diameter. Unit's spades tap around the tree, jack the tree and root ball out, and allow it to be moved to a new location. The 32-in. model makes a 32-in. ball 21 in. deep. All are made of 3/16-in. CorTen low-alloy steel.

Circle #299

VALENT

800/898-2536

www.valentpro.com

Control glassy-winged sharpshooter on ornamental plants, shrubs, trees and non-bearing fruit trees with Tame 2.4 EC spray from Valent, Walnut Creek, CA. This insecticide/miticide has a 2(ee) recommendation in California where it was approved to keep glassy-winged sharpshooters from migrating from trees to grapes. It is labeled for application at 10.66 fl. oz. per 100 gallons.

Circle #300

VERMEER

888/837-6337

www.vermeer.com

Designed for large volume wood and yard waste disposal, the TG800 tub grinder from Vermeer, Pella, IA, delivers 800 hp into a gear-reduction, transmission-driven hammermill. The Cat 3412E is an electronic, fuel-injected, twin turbo-charged aftercooled engine. At 11 ft., tub has largest inside diameter in the industry, with a top flare of 13.6 ft. Belly conveyor, a 60-in. belt, operates at 744 ft. per minute. Debris exclusion shroud diverts spillage away from the machine.

Circle #301

Artful way to inlay

This landscape contractor combines art and technology to produce great looking patios

BY YOGITA SHARMA

Johnston's Nursery has been in the landscape design and maintenance business since 1928. Yet the task of building a paved patio with an inlay elk head 16 feet by 20 feet proved to be a challenge for owner Corey Johnston Wise, who not only accomplished this task but also seems to have devised a new inlay technique in the process.

Art in the woods

In the spring of 1999, Wise was assigned the task of installing two patios for a customer who owns a cedar-log house in the forest of northwestern Pennsylvania. Nestled in a 30-acre woodland at the base of a steep hill, this house has a large A-frame room at its center. The front and rear windows of this room overlook the two patios on either side of the house.

The customer wanted to keep with the

natural ambience of the log cabin, so Wise presented the idea of creating an elk head silhouette on the lower patio. As work progressed, Johnston's artist created silhouettes of a herd of running deer and a howling wolf for the second patio as well.

Getting to work

For Wise, who had been working with colored pavers for years, this was a large project that offered him an opportunity to do

"something really innovative with color inlay." To create the silhouette, Wise used contrasting colors of Stratford concrete pavers, manufactured by R. I. Lampus Co. of Springdale, PA, using Bayer Corporation's Bayerferrox synthetic iron oxide pigments. Charcoal tone pavers were chosen for the elk head inlay to provide a sharp contrast to the desert blend pavers used for the background.

The elk head patio was dry-laid and took around two weeks to complete. First, a firm patio base was built by placing geotextile over the subsoil, which was then covered with six to eight inches of com-
Wise's elk head design looks painted or etched onto the pavers because the joints are so tight.

pacted aggregates. A one-inch layer of sifted sand was laid over the aggregates before placing three different lengths of interlocking pavers over the entire patio to create a cobblestone effect.

The most cumbersome aspect of the installation was the drawing and cutting of the elk head, which took four days. A computer-generated silhouette was traced onto the patio using a black permanent marker, and then each desert blend paver crossed by the outline was removed and cut using a diamond blade saw. To create the inset section, a corresponding charcoal paver was cut and placed along the outline. The rest of the pavers were later installed in the interior of the silhouette.

The result was an inlay that looks painted or etched onto the pavers. "The joints are so tight," says Wise, "that people can't believe it's an inlay."

The second patio was laid using the same technique. Both patios provide durable and low maintenance pavement that adds to the aesthetic appeal of the house.

The artful elk head patio won second place for concrete pavers in a residential setting at the ICPI National Competition in 2000.

For more information on this technique, contact Johnston's Nursery, Penfield, PA at 814/765-9081 or westwood@penn.com.

ask the expert

BY BALAKRISHNA RAO

Kudzu quandary

We're having problems managing Kudzu weed. Can we use PBI-Gordon Brushmaster herbicide safely to manage it?

— NC

Kudzu is a severe weed pest in many parts of the southeast. Transline, a selective herbicide by Dow AgroSciences containing clopyralid, can be applied if the Kudzu is growing over desirable, tolerant tree species. Check the supplemental label for examples of tolerant species before applying. Only plants that have emerged at the time of application will be affected and some needle/leaf curling of the desirable species may occur if applied during active tree growth. Another selective herbicide, Brushmaster by PBI-Gordon, can be used where desirable sensitive plants are not involved. Brushmaster is a low-volatile ester formulation containing 2,4-D, 2,4D-P and Dicamba. Low-volatile ester formulations can volatilize, particularly under high heat conditions, so be careful when treating an area around desirable broadleaf plants. Herbicide applications are most effective between late June and early October, as long as the Kudzu are actively growing and not under drought stress. The ideal application time is just prior to or during flowering. Always read and follow label specifications for best results.

Railroaded by weeds

We're interested in controlling vegetation near a railroad right-of-way for hiking trail clearance. What would be the best way to control all weeds?

Some of the area is gravel. We want to use chemicals that won't leach but will provide good control.

— OH

In your situation, you may be dealing with both grassy and broadleaf weeds. Your best option to manage a wide variety of existing weeds, as well as future weed growth, is to use a combination of postemergent and preemergent herbicides. Consider using a combination of herbicides such as Roundup and Surflan, or Roundup and Karmex.

Before applying, be sure that you or the person doing the application have the proper right-of-way vegetation management license to apply herbicides near specific sites being managed.

Roundup is a non-selective herbicide, which means it will discolor and kill any green vegetation. Therefore, use caution while applying. Depending on the vegetation type, the spray mix concentration will vary.

If the weeds present a problem in certain areas, consider spot treating with herbicides such as Roundup, Finale or Scythe.

Jumpin' junipers!

What might be responsible for the browning of juniper plant tips? On some plants we have found that .25- to .5-in. long tips are damaged and brown.

— PA

Based on your description, the problem is most likely caused by the juniper tip midge (*Oligotrophus betbeli*). Adults are a small

(1/8-in. long), grayish, mosquito-like fly. This is a true native fly. The larvae are 3/16-in. long maggots which mine inside needles and cause small galls. Several generations can be produced during the growing season. It then overwinters in the terminal tip galls.

When making a diagnosis, look for .25- to .5-in. long terminal buds on the outer foliage. Gently break open the tips and examine for evidence of mining and possibly the presence of reddish insects (maggots). They may also be in the pupal stage. Throughout the winter months, larvae can be found in tip galls. These galls are formed as a result of midge maggots mining in several needles at the bud tips. These galls are about the size of normal buds. Galls will remain green until the larvae begin to mature, then turn red and eventually become brown.

If it isn't severe, selectively prune infested tips and discard during dormant season. In heavy infestations, consider treating with insecticides such as Acephate or Dimethoate. Treat around mid-May and again around mid-June, early August and mid-September as needed.

If the problem is due to fungal blights such as juniper tip blight (caused by *Phomopsis* sp.) or Kabatina blight (caused by *Kabatina* sp.), larger portions of the tissue will be discolored and, as the disease progresses, fungal fruiting bodies will be found upon incubation in labs. Accordingly, treatment can be provided to manage these. Read and follow label specifications for best results.

TECH CENTER

Tight walkin'

Sutech says its Stealth mower, a 33-in. walk-behind, is lightweight and maneuverable and can get into tight areas and trim around anything. The deck is made of 11 gauge fabricated steel, and mower has mulching and cutting capabilities. Other features include zero-turn radius and three forward ground speeds.

For more information contact Sutech at 888/536-8368 or visit www.sutechusa.com / circle no. 250

Strength with support

Tree-Mate-O permits a newly planted tree to achieve proper development. It was made to encourage greater caliber and quicker root strength. When it is attached to a single "T" or "U" post, a torsion bar effect improves the post's ground gripping action. Tree-Mate-O is for all types of trees up to 2 in. in diameter.

difficult locations. It's available in standard and heavy duty models.

For more information contact Geo-Boy at 800/436-2691 or visit www.geo-boy.com / circle no. 254

Rad rake

Billy Goat Industries' CR Series compact power rake is engineered with fewer parts and less hardware mounted on a steel deck to reduce noise, vibrations and maintenance.

For more information contact Billy Goat at 816/524-9666 or visit www.billygoat.com / circle no. 255

Process this

Vandermolen Corp.'s 20Q14E is the newest member of the company's All Vegetation Processor line. It's powered by a 14- or 16-hp Vanguard engine and can process four- to five-in. fully dressed branches. A two-in. ball hitch makes it easy to tow.

For more information contact Vandermolen at 973/992-8506 or visit www.vandermolen-corp.com / circle no. 256

Split 'em up

Foster Manufacturing Corp.'s Model FLS-550-HV commercial series log splitter can be used in

either a horizontal or vertical position. It has a Honda GX-160 5.5-hp engine and can handle logs up to 26 in. long. The splitter also contains a 1-7/8-in. ball coupler hitch.

For more information contact Foster at 262/633-7073 or visit www.fostermfgcorp.com / circle no. 257

Collect 'em up

The ODB Co.'s Metro is a belt-driven vacuum leaf collector with a rear loading unit and hydraulic hose boom. It features a John Deere Model 4020D 4-cylinder water-cooled diesel engine and 14-in. x 120-in. wire reinforced urethane suction hose.

For more information contact ODB at 800/446-9823 or visit www.theodbco.com / circle no. 258

Capable cart

Bachtold Bros.' commercial duty cart wagon has the ability to hold 400 lbs. and up to 5 cu. ft. of material. It has a 14 gauge stainless steel body, angled front and 20-in. nickel-plated wheels. For extra heavy hauling, the handle of the cart converts to a wagon tongue so it can be pulled along by a tractor or riding mower.

For more information contact Bachtold Bros. at 217/784-5161 or visit www.bachtoldbros.com / circle no. 259

Light up the night

Sculpturite lighting by Pinecrest can be mixed and matched to suit your tastes. Many of Pinecrest's lighting posts are triangular in configuration. Each design is first carved into hardwood, then used to form the sand molds into which aluminum is cast.

For more information contact Pinecrest at 800/443-5357 or visit www.pinecrestinc.com/ / circle no. 260

Floodlight fun

RAB Electric Manufacturing's "H101" is a landscape floodlight with a bell design made for

easier relamping and glare reduction. The new floodlight has durable one-piece die cast construction with rugged mounting arm. It accepts 150 watt PAR 38 lamp maximum. The fixture also has a large silicone gasket to provide weatherproof protection around the lamp and socket.
