

# GRUBS AREN'T SCARY. POW CHUCKLES — HE'S SCARY.

We probably can't help you overcome your fear of clowns. But, if your biggest fear is grubs munching on your roots, relax. With MERIT® Insecticide from Bayer Corporation, you need fear no grub — Guaranteed.

MERIT is known industry-wide as the best option for preventing grub damage. Plus, MERIT effectively kills white grubs when they are already present, feeding on the roots of your turf. That means MERIT offers the best control of white grubs before signs of damage are visible, or pre-damage, from egg-lay to second instar.

Figure 1: MERIT provides the best pre-damage control of the Big 5. The Big 5 includes the Japanese beetle, oriental beetle, european chafer, northern masked chafer and southern masked chafer.

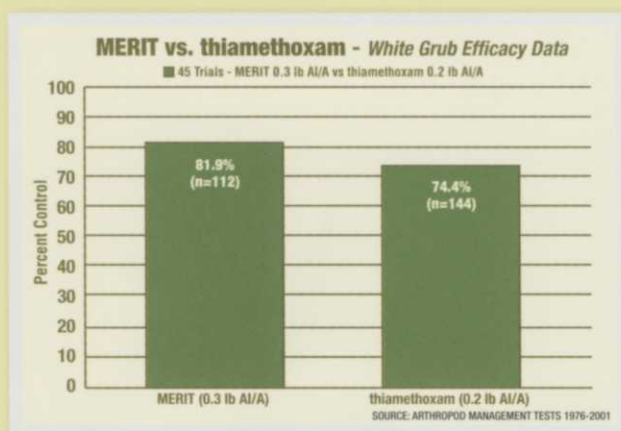

Figure 2: MERIT outperformed thiamethoxam in white grub efficacy tests.

Some tough competition has come along over the years, but we've never even flinched. MERIT still offers the most effective grub solution (see figure 1), and efficacy tests show thiamethoxam won't change that (see figure 2). So, relax. Fear no grub, guaranteed, with MERIT from Bayer. For more information, contact Bayer Corporation, Professional Care, P.O. Box 4913, Kansas City, Missouri 64120. (800) 842-8020.
