CHASER 2
AMINE HERBICIDE

KLEENUP PRO
GRASS AND WEED KILLER

CHASER ULTRA is three way combination of MCPA, Clopyralid and 2,4-DP, which is aimed at providing effective control in both cool and warm seasons. It is an excellent choice for broadleaf weed control and has demonstrated exceptional control on white clover, dandelion and plantain.

CHASER is the original ester formulation of 2,4-D and triclopyr that controls most broadleaf weeds, including hard-to-kill weeds that other comparable chemistries do not control. It has shown excellent turf safety and mixes well with most pesticides and fertilizers.

CHASER 2 has all the power of Chaser with the safety of a warm weather amine formulation. It can be used on ornamental turf such as lawns, golf courses (fairways, aprons, tees and roughs), parks, highways, cemeteries and similar non-crop areas; and sod farms.

KLEENUP PRO is the easy-to-use and proven 41% glyphosate solution for keeping landscaped areas clear of weeds and unwanted grasses and for spot controlling weeds in hard to reach places. The long-lasting systemic control prevents regrowth and has virtually no residual activity.

Get In. Hang On.

No matter what you're spraying, these adjuvants will get you where you need to be.

The basic role of an adjuvant is one of two tracks, to either help chemicals penetrate into the plant or to adhere to the leaf surface.

If your goal is systemic action, no other non-ionic surfactant or penetrant product is superior to **LI-700** and **Liberate**.

If you desire to enhance the effectiveness of contact products, look no further than **Tactic**.

All of these high-performance, premium adjuvants have been tested to ensure plant safety and used effectively around the world.

LI-700

- Maximizes penetration through waxy layer of foliage while maintaining integrity of the plant's protective system
- Acidifying feature reduces pH of spray solutions
- Unique chemistry provides excellent drift control
- Allows more uniform coverage and even spreading

LIBERATE

- Same penetrating and low-phytotoxicity benefits of LI-700
- pH neutral with a "CAUTION" label for maximum safety
- Low-odor formulation also provides superior drift control

TACTIC

- High quality sticking agent maximizes residual activity
- Organosilicone super-wetter gives total coverage
- Resists wash-off by dew, rain or irrigation

ABSOLUTELY HAMMERS MITES.

Pampers Everything Else.

No miticide performs as well as Floramite® against key mite pests in all life stages. It pounds tough pests like two-spotted and spruce spider mites with hard-hitting contact action. Then, it gives long residual control, up to 28 days, to get those late hatches.

Floramite features a unique mode of action and highly selective activity so it's easy on predacious mites and beneficial insects. And its low toxicity means it's easy to work with and safe for the environment.

If you want to drop the hammer on mites, while you pamper everything else, get the economical, user-friendly control of Floramite.
