

MIGHTY. QUIET.

INTRODUCING THE POWERFUL AND SURPRISINGLY QUIET GMC® SIERRA®.

Jackhammers. Bulldozers. Impatient foremen. There's enough commotion on the job site without your truck adding to it. So our engineers designed the GMC Sierra to provide some peace and quiet. This impressive pickup offers a choice of incredibly powerful yet surprisingly quiet engines. Like the optional DURAMAX™ 6600 Turbo Diesel V8 that delivers 300 hp @ 3000 rpm and 520 lb-ft torque @ 1800 rpm. It offers exceptionally smooth, quiet operation, thanks to an innovative deep-skirt block design and common rail fuel injection that helps control noise, vibration, and harshness. Even the available Allison® transmission is engineered for smooth shifting and equally quiet operation. The newly redesigned GMC Sierra. You should hear what you're missing. For details, visit gmc.com or call 1-800-GMC-8782.

Controllers for Contractors

Who Want Advanced
Features *and*
Faster Set Ups

ICC

Pro-C

By the time most contractors are ready to program the controller, the truck is loaded and the crew has moved on to another site. That's why Hunter offers a new way to make irrigation programming routine and easy. Our expanded line of controllers not only look alike, they install and program alike too. For large sites, the **modular ICC** has sophisticated water management tools and easily expands from 8 to 48 zones. For res/com jobs, the **Pro-C** also offers the benefits of modularity with 3 to 15 station expandability, plus a removable face plate for "walk around" programming. The compact **SRC** is your best bet for standard residential sites and features 6 or 9 stations, plus odd/even watering and more.

OTHER PREEMERGENTS TALK A LOT ABOUT CRABGRASS.
WITH PENDULUM, IT NEVER COMES UP.

©2003 BASF Corporation. All rights reserved.
Pendulum is a registered trademark and AquaCap is a trademark of BASF.
*Based on field trials conducted during 2001 at Clemson University, Texas A&M University,
University of Arkansas, N.C. University, Penn State University and University of
Maryland. Pendulum AquaCap is registered for use in commercial lawncare.

Pendulum® herbicide consistently controls crabgrass better than other preemergent herbicides.* What more can we say? How about **Pendulum** controls a broader spectrum of weeds, in both lawns and ornamental beds, than any other preemergent—more than 40 grassy and broadleaf weeds, such as oxalis and spurge. It also controls costs, to offer you greater value. But **Pendulum** puts no limits on application flexibility. It's available as **Pendulum AquaCap™**—an encapsulated, water-based formulation—as well as granular and liquid formulations.

BASF pendimethalin is also available on fertilizer. Visit www.turffacts.com for a list of approved fertilizer formulators. With **Pendulum**, there's just so much more to talk about than crabgrass.

To learn more about why everyone's talking about **Pendulum**, call 1-800-545-9525 or visit www.turffacts.com. Always read and follow label directions.

WE DON'T MAKE THE TURF. WE MAKE IT BETTER.

Healthy tree growth
right out of the box

Install Confidence.™ Install Rain Bird® RWS Series.

Water, air and nutrients are able to reach deep roots directly, using this patent-pending system that features a retaining cap and 36" long semi-rigid mesh tube.

- Root Watering System comes ready to install right out of the box, making installations quick and easy.
- Watering time can be reduced, because nourishment is delivered directly to the roots.
- Enclosed design with grate-locking feature protects the system from vandalism.
- Compatible with drip emitters, or can be purchased with a pre-installed bubbler and check valve.

Visit www.rainbird.com for additional details about the RWS Root Watering System that promotes healthy tree growth in one complete, right-out-of-the-box package. **Install Confidence. Install Rain Bird.**

BY RON HALL / EDITOR-IN-CHIEF

Prepare for the big squeeze

The next major source of fresh water for our growing society will be squeezed from those of us who irrigate lawns and ornamentals, and from our customers, too.

This "new" source of fresh water is the 25% to 35% that water purveyors say homeowners waste on their landscapes because of inefficient irrigation. As 2002's droughts and severe water restrictions reminded us, this sentiment isn't limited to any single region.

Eye-opening droughts

Last season, water restrictions resulting from droughts slowed Green Industry activity in the Northeast, the Mid-Atlantic and some areas of the Midwest. It also created a big problem in the Denver area. (See "Drought — prepare a plan" on page 46.) This peek into our future water situation is no revelation to colleagues in regions such as Arizona and Southern California, which get much of their fresh water from a single source.

The Colorado River is the lifeblood of this arid region with its a 360-day-a-year growing season. The Southwest is also the fastest growing section of the United States, with its fresh water needs growing daily.

But there's only so much water to be apportioned among seven states, with Mexico using what's left. The Colorado gives up all of the water that it collects from the mountains in Colorado and Wyoming. Last year it wasn't nearly enough.

Record low snowfall in the Rocky Mountains during the winter of 2001-2002 left the river suffering, leaving it at 26% of its normal flow. Even with welcome spring precipitation, water levels of its massive lakes are still low.

Not all of our industry's water concerns are as immediate or dramatic, but they are as real.

Wise up

All of us must wise up and practice proper irrigation and water conservation techniques. More importantly, we have to get the word out to our clients, particularly our residential customers. Water officials say that homeowners are the worst water wasters, and that's the segment of our customers that will be asked to make the biggest water sacrifices.

What does this mean to us? It means:

- ▶ designing and installing turf and landscapes appropriate for the regions where we do business,
- ▶ taking advantage of the latest and most efficient irrigation technology,
- ▶ educating our clients and helping them manage and maintain their irrigation systems, and
- ▶ becoming a part of the water decision-making process in our communities.

It will do no good for us to moan about our bad luck or butt heads with water purveyors when the next water crisis arrives. It's better — much better — that we become a part of the water wise movement now.

Contact Ron at
440/891-2636 or e-mail at
rhall@advanstar.com

All of us in the Green Industry need to **Wise up** and practice **proper irrigation** and **water conservation techniques.**

In an annual head-to-head contest for Green Industry publications, the Advanstar Landscape Group once again reaped more Turf & Ornamental Communicators Association writing, design and photography awards than any other publisher. Congratulations to our entire content team.
