

A close-up, blue-tinted photograph of several grass blades, showing their texture and structure. The blades are arranged in a somewhat chaotic, overlapping pattern, creating a sense of depth and movement.

SYSTEMIC STROBILURIN - BENTGRASS AT 240%

To protect longer,
you have to work from the inside.

That's the power of a systemic. Xylem to tip, Heritage® is the only systemic strobilurin that protects each and every blade of grass, including new growth. Broad-spectrum disease control protection from the inside, that lasts up to 28 days against all four major classes of fungi and the six major turf diseases. Heritage works from the inside so your turf looks good outside. Call 1-800-395-8873 to contact your local Syngenta sales representative and learn more about Heritage.

The Heritage Fungicide logo, featuring a stylized green leaf icon to the left of the word "Heritage" in a script font, with "FUNGICIDE" in a smaller, sans-serif font below it.
