Giving the green light
to one-man installation.
That's intelligent.

With the Rain Bird® WR2, one person can install
the system in half the time of competitive wireless
rain sensors. So you can save labor costs for your
business while saving wasted water for your
customers. That's The Intelligent Use of Water.™

Step 1

*All settings programmed in
one place using intuitive icons.*

Step 2

*Blinking green light indicating
signal strength expedites
sensor placement.*

Step 3

*Versatile bracket snaps on
gutters easily or can be
mounted to walls or fences.*

RAIN BIRD®
