Summary Information

Repository:	University Archives and Historical Collections
Creator:	Michigan State University. Department of Botany and Plant Pathology
Creator:	Michigan State University. Department of Plant Biology
Title:	Department of Botany and Plant Pathology records
ID:	UA.16.21
Date [inclusive]:	1876-1992
Date [bulk]:	1899-1992
Physical Description:	2 Cubic Feet
Language of the Material:	English .

Preferred Citation

Historical Note

The Plant Biology Department started in 1859 and was called Plant and Vegetable Physiology. In 1870, William J. Beal became the first professor of botany at Michigan State University (MSU). In 1880, the first Botanical Laboratory was built. It burned to the ground in 1890. The second Botanical Laboratory was built in 1893 on Circle Drive and is now referred to as the "Old Botany Building." In 1932, the department changed its name to Botany and Plant Pathology. In 1949, the Natural Science building was finished and the department was located there. In 1968, the Plant Pathology building was completed as an addition to the MSU/DOE (U.S Department of Energy) Plant Research Laboratory. On July 1, 2001, the Board of Trustees approved a reorganization and name change. The name changed to Plant Biology. A separate

Department of Plant Pathology was a joint department with the College of Agriculture and Natural Resources.

[^ Return to Table of Contents](#)

Scope and Contents

The collection consists of a pamphlet that gives a thorough description of the Sanford Natural Area; the booklet "Exploring the Ecology Along the Red Cedar River" by Dorothy McMeekin, news clippings of obituaries and funeral programs of faculty; and a comprehensive list of the requirements for a Bachelor's degree in Botany. There are also bulletins about plants and plant pathology information put out by the department. Also included are materials related to the Seminarium Botanicum (Sem Bot) Club including the Botanists Bugle newsletter and a club record book.

Photographs include images of crops, fungi, lumbering, roots and grafting of trees and shrubs, scenes of the Michigan State University campus including buildings, Beal Botanical Garden, the deer park, and students in classes.
