Historical Note

In 1956, the Michigan State University Computer Laboratory was created to provide centralized academic computing functions. MSU's first computing system, MISTIC (Michigan State Integral Computer), began operation in 1957. The Computer Laboratory updated its computing systems many times and expanded its facilities in order to provide the university community current technology.

Over the years, the Computer Laboratory offered a variety of services including consultation, computer training, document development and design, computer repair, program debugging, and office automation.

As services expanded, the Computer Laboratory name changed in 2004 to Academic Computing and Network Services (ACNS) and again in 2008 to Academic Technology Services (ATS).

In 2012, ATS merged with Administrative Information Services to become IT Services under the Vice Provost for Libraries, Computing and Technology (LCT).

[^ Return to Table of Contents](#)

Scope and Contents

This collection contains records of the Michigan State University Computer Laboratory. The records consist of plans, computer manuals, and reports during the creation and early days of the Computer Laboratory; computer system notices; bulletins; fact sheets; and other working papers of the organization as it evolved into Academic Computing and Network Services (ACNS) and Academic Technology Services (ATS). Electronic Resources includes issues of the electronic newsletters *ATS eNews* from 2007 to 2010.
