---

## Historical Note

---

In 1951, the American Association of Agricultural College Editors (AAACE) began to investigate establishing a project for professional improvement in the distribution of agricultural information. Groups such as the Extension Committee on Organization and Policy, Experiment Station Committee on Organization and Policy, and National Association of Radio Farm Directors worked with the W.K. Kellogg Foundation to secure funding to develop a program for applying principles of the newly developing science of communications for wider dissemination of information in agriculture and home economics. Michigan State College (now University) was selected by the Executive Committee as the site for the project.

## Scope and Contents

---

The records of the National Project in Agricultural Communications (NPAC) consist of background information, reports, budgets, Board of Control minutes, correspondence with the Kellogg Foundation, and materials relating to the training programs including the Communication Training Program.
